

PUBLIC PRIVATE PARTNERSHIP PROJECTS

2026

CHARGES TARIFF

PRESENTATION

DHMI Airport Fee Tariffs come into force with the approval of the Ministry of Transport and Infrastructure in accordance with Article 37 of the Turkish Civil Aviation Law No. 2920 and within this framework.

2026 PPP Projects Fee Tariffs will come into force as of 01.01.2026. It remains in effect until the new fee tariffs come into force. These tariffs are administered by Airport/Terminal Operators.

PPP Projects Fee Tariffs are prepared by DHMI General Directorate PPP Department.

In general, increases in fees listed in the KÖİ Airport Fee Tariffs will be based on the following: For fee increases in euros, the rate of change in the European Union (27 countries) Producer Price Index over the last 12 months and the average rate of change in the Consumer Price Index over the last 12 months for the European Union (27 countries) Consumer Price Index over the last 12 months. For fee increases in Turkish Lira, the change rates based on the twelve-month averages (CPI) are taken into account, while sectoral input increases and changes in service costs are also evaluated to determine the increases.

	Tariff Name	Page
1	Tariff for International Landing, Parking, Lighting and Approach	1
2	Tariff for Domestic Landing, Parking, Lighting and Approach	4
3	Tariff for Passenger Service	7
4	Tariff for Safety Precaution	10
5	Tariff for Aircraft / Vehicle Marshalling	11
6	Tariff for Extension of Airport Working Hours	12
7	Tariff for Passenger Boarding Bridge Services	13
8	Tariff for Ground Handling Services	15
9	Tariff for Refueling Concession	19
10	Tariff for Apron Vehicle Private Plate	20
11	Tariff for Terminal Electric Transport Vehicle Plate	23

26	Tariff for Luggage Locker Services	59
27	Tariff for Baggage Tracking Service	60
28	Tariff for Lost Luggage Storage Service	61

2026 TARIFF FOR INTERNATIONAL LANDING, PARKING, LIGHTING AND APPROACH

1. SCOPE:

This tariff contains the charges and the principles of application about international landing, parking, lighting and approach services provided to all Turkish and foreign registered aircraft using the airports operated by the Airport Operators within the scope of Public Private Partnership (PPP) projects tendered by the General Directorate of State Airports Authority (DHMI).

2. PRICING SCHEDULES:

a. International Landing Charges:

AIRPORT	NUMBER OF LANDING*	CHARGE (Euro/Tons)
İstanbul	Between 0-2000 Landings	13,28
	Between 2001-4000 Landings	12,72
	4001 and over	11,94
Çukurova	Between 0-2000 Landings	12,76
	Between 2001-4000 Landings	12,22
	4001 and over	11,49
Zafer	Between 0-2000 Landings	7,93
	Between 2001-4000 Landings	7,58
	4001 and over	7,20
Gazipaşa Alanya Zonguldak Çaycuma Aydın Çıldır	Between 0-2000 Landings	6,34
	Between 2001-4000 Landings	6,06
	4001 and over	5,75

(*) The fees are charged according to the total number of international landings made by the air carrier at relevant airports during the year. The transition between the grades is applied to the flights starting from the beginning of the following month according to the number of landings reached by the air carrier. The number of landings is reset on December 31st of each year.

b. International Parking, Lighting and Approach Tariff:

AIRPORT	PARKING (24 hours)	APPROACH (Including VFR)	LIGHTING
	CHARGE		
	(Tons/Euro)	(Per Landing) (Euro)	(Per Landing and Take Off) (Euro)
İstanbul	4,08	74,40	81,84
Çukurova	3,92	57,24	78,69
Zafer	1,95		77,27
Gazipaşa Alanya Zonguldak Çaycuma Aydın Çıldır	1,56		62,95

3. PRINCIPLES OF APPLICATION:

- Landing and parking charges are calculated according to the maximum take-off weight mass registered in the aircraft's Registration Certificate and/or Noise Certificate. In the absence of these documents, Load and Trim Sheet is taken as basis. In the calculation, ton fractions are rounded up to 1.000 kg. For aircraft with a maximum take-off weight mass of 20 tons or less, the maximum take-off weight mass is calculated as 20 tons. (Landing and parking fees for aircraft with a maximum takeoff weight of 0-2 tons are calculated based on the aircraft's own maximum takeoff weight/mass.)
- Parking starts with the aircraft touchdown and ends with the engine run-up permission. The start and end times are shown in the invoice attachments. If the parking is less than 2 hours, parking is free of charge. If the duration of the parking exceeds 2 hours, based on the landing time, the parking fee in the table 2b is charged for each 24 hours following the landing time.
- In case the departure is delayed by DHMI Air Traffic Control Unit even though all kinds of procedures for take-off has been completed and the take-off permit has been requested, no parking fee will be charged for the delayed period.

2026 TARIFF FOR INTERNATIONAL LANDING, PARKING, LIGHTING AND APPROACH

- d. At Istanbul Airport, a 200% surcharge is applied for the second stay exceeding 24 hours, and a 300% surcharges for the third stay, all year round. For parking of more than 3 days throughout the year, a 500% surcharge will be applied to the entire parking.
- e. Increased parking fees in Schedule 3(d) of the Principles of Application are not applied to aircraft that are not allowed to take off by international and national political, military and civil aviation authorities or courts during the flight ban period, provided that parking is made in the area indicated by the Airport Operator if there is a suitable place at the airport.
- f. Aircrafts that are commercial air carriers, but do not have traffic rights (no passenger or cargo landing and boarding), and have technical landing permits for refueling, customs clearance, crew change, crew rest (provided that it does not exceed 24 hours), etc. are charged 50% of the landing and parking fees at airports other than Istanbul Airport. In the event that the aircraft that do not take off immediately after the technical landing is over, landing and parking fees are applied without discount.
- g. Lighting fee is applied separately for each landing and takeoff during the hours when the lighting systems are operating depending on seasons and visibility conditions. For Turkish registered aircraft, the fee is charged according to the direction of departure flight (domestic / international) in which the lighting service is provided. Lighting fee is charged according to the time of landing and take-off in the ATC Tower records (if the aircraft is subject to receipt of payment in cash, FPL is taken as basis).
- h. For a Turkish registered aircraft arrives with an international flight, international fees for landing and approach are charged at the first airport where they land.
- i. Domestic flights made by aircrafts of foreign airline carriers are considered as international flights and fees are charged accordingly. (Except for aircraft with a maximum take-off weight between 0-2 tons)
- j. For aircraft flying to Türkiye specifically for organizations such as festivals, winter games, Olympics, etc., provided that permits are obtained from General Directorate of Civil Aviation and that they are not commercial air carriers, the fees in this tariff are not applied for the first five days at Airports other than Istanbul Airport. On the following days, 25% of the fees in the tariff are applied.
- k. Parking charge for the aircraft, which are compulsorily landed due to the removal of registry or not being able to operate flight due to accident and / or incidents such as fire, is applied beginning from the incident until the aircraft is towed away on condition that it is towed away by the Airport Operator to a field not in use or outside the specified parking field within 30 days following the incident. 25% of the charge is applied to the aircraft after it is towed away to a field determined by the airport operator not in use or outside the specified parking field within 30 days. Other discounts and price rises are not regarded in the calculation of this parking price. The relevant Airport Operator is authorized to remove the aircraft or have it removed in the event that the aircraft has not been removed within 6 months after the legal procedures have been completed. The charge of removal must be paid by the aircraft owner or operator company (date of withdrawal from registration notified by Directorate General of Civil Aviation is taken as the basis)
- l. Due to meteorological reasons or malfunctions in airport systems/services, aircraft that cannot land at the planned landing airport and land at another airport will be charged the fees in the tariff. However, if the flight continues to the planned airport, 50% of the landing (approach, landing and lighting) fees are charged at the airport where the flight is completed and at the first landing airport.
- m. Aircraft subject to cash payment are allowed to take off in coordination with Air Traffic Management / Unit subsequent to the cash payment in accordance with the Airport Operator's legislation.
- n. In case there is more than one discount in the tariff that reduces the unit prices, only the proportionally largest of the discounts in the same service item is applied.
- o. Charges are based on the flight purpose stated in the permit or flight plan obtained from the Directorate General of Civil Aviation.
- p. Approach fee is collected from airlines by the Airport Operator and paid to DHMI.
- q. Hangar and the Hangar Anterior Parking

1) Private hangars;

Inside Hangar;

- a. No parking fee is charged for the aircraft operated by the hangar operator.
- b. Aircrafts operated by other natural or legal persons are charged a parking fee.

Hangar Anterior;

- a. Provided that the apron area in front of the hangar is an area allocated to the hangar tenant, the rent is paid and this area is constructed by the hangar tenant as a private apron; parking fee is not charged for aircraft operated by the private hangar operator.
- b. Aircrafts operated by other natural or legal persons are charged a parking fee.
- c. All the aircrafts parked inside and on the private apron constructed by the private hangar operator in the area allocated to the hangar tennant, are declared to Airport Operator by the private hangar operator on a daily basis, separately inside the hangar and in front of the hangar. The declaration of the hangar operator are checked and approved by Airport Operator.
Special provisions regarding parking, if any, apply in the lease agreement.

2) Technical maintenance hangars and private hangars with maintenance authority;

Inside Hangar;

- a. Aircrafts operated by the leasing company and/or the founding company are not charged for parking.

- b. Aircrafts operated by other natural or legal persons that parked for maintenance and repair (engine and engine running tests, controls cannot be performed inside the hangar, awaiting repair part, and such circumstances) are not charged for parking.
- c. Aircrafts operated by other natural or legal persons that parked for purposes other than maintenance and repair are charged for parking.

Hangar Anterior;

- a. Provided that the apron area in front of the hangar is an area allocated to the hangar tenant, the rent is paid and this area is constructed by the hangar tenant as a private apron; parking fee is not charged for aircraft operated by the company leasing the hangar and/or the company founded it.
- b. Aircrafts parked for maintenance and repair (engine and engine running tests, controls cannot be performed inside the hangar, awaiting repair parts, and such circumstances) are not charged for parking.
- c. Aircrafts maintained and repaired, awaiting maintenance and repair parts, including the ones whose maintenance has been completed but continue to park inside or anterior to the hangar all shall be separately declared to Airport Operator by the hangar operator on a daily basis inside the hangar and in front of the hangar. The declaration of the hangar operator are checked and approved by Airport Operator.
- d. In the event that it is determined that the aircraft operated by other natural or legal persons, which continues to be parked in or in front of the hangar without maintenance-repair and/or following the end of maintenance-repair, is declared to be waiting for maintenance-repair, parking fee is charged for the entire parking period from the date of landing. Special provisions regarding parking, if any, apply in the lease agreement.

r. The charges are not applied under the following conditions:

- (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes.
- (2) Aircraft carrying Heads of States on their official visits,
- (3) The aircraft that belong to our national state establishments and organizations, (Except for aircrafts of state / foundation universities and aircraft used within the scope of service procurement contracts of public institutions and organizations.)
- (4) Aircraft returning to the airport of departure (If the parking exceeds 24 hours, parking fees and lighting fees, if any while departing, are charged from the time of landing),
- (5) Aircraft which are not able to take off due to meteorological reasons or any malfunction on the airport systems / services limited to the flight prohibition period,
- (6) Aircraft executing test and practice flights (provided that the airport authority is notified in advance and the departure/landing airport is the same/except for parking),
- (7) Aircraft carrying military aid material to Republic of Türkiye,
- (8) Foreign military aircraft on condition of reciprocity,

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. If air carriers transport their own passengers by renting aircraft belonging to another air carrier, the fees in the tariff are paid to the Airport Operator by the air carrier renting the aircraft.
- c. If the arriving and departing airlines are different, approach, landing, and landing lighting fees are charged to the arriving airline, while parking and departure lighting fees are charged to the departing airline.
If the registration/operator is changed during the parking process, the part of the parking fee before the registration/operator change date is taken from the arriving airline, and the part after the registration/operator change date is taken from the departing airline.
- d. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- e. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR DOMESTIC LANDING, PARKING, LIGHTING AND APPROACH**1. SCOPE:**

This tariff contains the charges and the principles of application about domestic landing, parking, lighting and approach services provided to aircraft with a maximum takeoff weight of 0-2 tons used for domestic flights and to Turkish-registered or foreign-registered leased aircraft operated by domestic carriers using the airports operated by the Airport Operators within the scope of Public Private Partnership (PPP) projects tendered by the General Directorate of State Airports Authority (DHMI).

2. PRINCING SCHEDULES:**a. Domestic Landing, Parking, Lighting and Approach Tariff:**

AIRPORT	LANDING	PARKING (24 hours)	LIGHTING (Per Landing and Take-Off)	APPROACH (Per Landing) (Including VFR)
	CHARGE (TL/ton)		CHARGE (TL)	
İstanbul	43,33	13,02	527,75	244,00
Çukurova	42,24	12,75	580,00	188,00
Zafer	25,78	10,56	611,00	
Gazipaşa Alanya Zonguldak Çaycuma Aydın Çıldır	20,70	8,22	462,19	

3. PRINCIPLES OF APPLICATION:

- Landing and parking charges are calculated according to the maximum take-off weight mass registered in the aircraft's Registration Certificate and/or Noise Certificate. In the absence of these documents, Load and Trim Sheet is taken as basis. In the calculation, ton fractions are rounded up to 1.000 kg. For aircraft with a maximum take-off weight mass of 20 tons or less, the maximum take-off weight mass is calculated as 20 tons. The landing and accommodation fees for aircraft with a maximum take-off weight between 0-2 tons and for aircraft of flight schools providing flight training are calculated based on their maximum take-off weight/mass.
- Parking starts with the aircraft touchdown and ends with the engine run-up permission. The start and end times are shown in the invoice attachments. If the parking is less than 2 hours, parking is free of charge. If the duration of the parking exceeds 2 hours, based on the landing time, the parking fee in the Schedule 2.a is charged for each 24 hours following the landing time. In case the departure is delayed by DHMI Air Traffic Control Unit even though all kinds of procedures for take-off has been completed and the take-off permit has been requested, no parking fee will be charged for the delayed period. For parking of three days or more, a 300% surcharge applies to the entire length of the parking.
- For flights of domestic air carriers from abroad to Türkiye, a Domestic Parking Fee is charged following the landing of the aircraft at the airport due to the nationalization of the aircraft.
- For the flights of foreign registered aircraft leased by public institutions and organisations established in Türkiye, following their first entry into Türkiye; Domestic Landing and Parking Fee is applied provided that a permit is obtained from General Directorate of Civil Aviation.
- In the event that Turkish registered aircraft are leased by a foreign airline, domestic parking fee is charged only during the maintenance period for parking for maintenance purposes.
- For aircraft flying to Türkiye specifically for organizations such as festivals, winter games, Olympics, etc., provided that permits are obtained from General Directorate of Civil Aviation and that they are not commercial air carriers, the fees in this tariff are not applied for the first five days at Airports other than Istanbul Airport. On the following days, 25% of the fees in the tariff are applied.
- For flights (except training flights) with aircraft having a maximum take-off weight between 0-2 tons, 20% of the fees in the tariff are applied.
- Lighting fee is applied separately for each landing and takeoff during the hours when the lighting systems are operating depending on seasons and visibility conditions. For Turkish registered aircraft, the fee is charged according to the direction of departure flight (domestic / international) in which the lighting service is provided. Lighting fee is charged according to the time of landing and take-off in the ATC Tower records (if the aircraft is subject to receipt of payment in cash, FPL is taken as basis).
- Aircrafts executing training flights to train pilots of flight schools that have received the obligatory permissions from the Ministry and the other relevant organizations, can do touch and go on the conditions that the flight notice is provided to Airport Operator before the flight and there are no passengers other than the flight crew and students on the aircraft. When touch and go is done Landing fee is fully charged for each touch and go at Istanbul and Çukurova Airport. %10 of Landing fee is charged for each touch and go at airports other than Istanbul and Çukurova Airport. Landing fee specified in Schedule 2.a is charged for landings made after "touch and go".

- j. Parking charge for the aircraft, which are compulsorily landed due to the removal of registry or not being able to operate flight due to accident and / or incidents such as fire, is applied beginning from the incident until the aircraft is towed away on condition that it is towed away by the Airport Operator to a field not in use or outside the specified parking field within 30 days following the incident. 25% of the charge is applied to the aircraft after it is towed away to a field determined by the airport operator not in use or outside the specified parking field within 30 days. Other discounts and price rises are not regarded in the calculation of this parking price. The relevant Airport Operator is authorized to remove the aircraft or have it removed in the event that the aircraft has not been removed within 6 months after the legal procedures have been completed. The charge of removal must be paid by the aircraft owner or operator company (date of withdrawal from registration notified by Directorate General of Civil Aviation is taken as the basis)
- k. Due to meteorological reasons or malfunctions in airport systems/services, aircraft that cannot land at the planned landing airport and land at another airport will be charged the fees in the tariff. However, if the flight continues to the planned airport, 50% of the landing (approach, landing and lighting) fees are charged at the airport where the flight is completed and at the first landing airport.
- l. No parking surcharges are applied to the aircraft, which are not permitted to take off by international or national political, military and civil aviation authorities or court of justice, on condition that suitable parking position is available at the airport and the aircraft park on the field specified by the airport operator during flight prohibition period.
- m. Aircraft subject to cash payment are allowed to take off in coordination with Air Traffic Management / Unit subsequent to the cash payment in accordance with the Airport Operator's legislation.
- n. In case there is more than one discount in the tariff that reduces the unit prices, only the proportionally largest of the discounts in the same service item is applied.
- o. Charges are based on the flight purpose stated in the permit or flight plan obtained from the Directorate General of Civil Aviation.
- p. Approach fee is collected from airlines by the Airport Operator and paid to DHMI.

q. Hangar and the Hangar Anterior Parking

1) Private hangars;

Inside Hangar:

- a. No parking fee is charged for the aircraft operated by the hangar operator.
- b. Aircrafts operated by other natural or legal persons are charged a parking fee.

Hangar Anterior:

- a. Provided that the apron area in front of the hangar is an area allocated to the hangar tenant, the rent is paid and this area is constructed by the hangar tenant as a private apron; parking fee is not charged for aircrafts operated by the private hangar operator.
- b. Aircrafts operated by other natural or legal persons are charged a parking fee.
- c. All the aircrafts parked inside and on the private apron constructed by the private hangar operator in the area allocated to the hangar tennant, are declared to Airport Operator by the private hangar operator on a daily basis, seperately inside the hangar and in front of the hangar. The declaration of the hangar operator are checked and approved by Airport Operator.
Special provisions regarding parking, if any, are applied according to the lease agreement.

2) Technical maintenance hangars and private hangars with maintenance authority;

Inside Hangar:

- a. Aircrafts operated by the leasing company and/or the founding company are not charged for parking.
- b. Aircrafts operated by other natural or legal persons that parked for maintenance and repair (engine and engine running tests, controls cannot be performed inside the hangar, awaiting repair part, and such circumstances) are not charged for parking.
- c. Aircrafts operated by other natural or legal persons that parked for purposes other than maintenance and repair are charged for parking.

Hangar Anterior:

- a. Provided that the apron area in front of the hangar is an area allocated to the hangar tenant, the rent is paid and this area is constructed by the hangar tenant as a private apron; parking fee is not charged for aircrafts operated by the company leasing the hangar and/or the company founded it.
- b. Aircrafts parked for maintenance and repair (engine and engine running tests, controls cannot be performed inside the hangar, awaiting repair parts, and such circumstances) are not charged for parking.
- c. Aircrafts maintained and repaired, awaiting maintenance and repair parts, including the ones whose maintenance has been completed but continue to park inside or anterior to the hangar all shall be separately declared to Airport Operator by the hangar operator on a daily basis inside the hangar and in front of the hangar. The declaration of the hangar operator are checked and approved by Airport Operator.
- d. In the event that it is determined that the aircraft operated by other natural or legal persons, which continues to be parked in or in front of the hangar without maintenance-repair and/or following the end of maintenance-repair, is declared to be waiting for maintenance-repair, parking fee is charged for the entire parking period from the date of landing.
Special provisions regarding parking, if any, are applied according to the lease agreement.

r. The charges are not applied under the following conditions:

- (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes.
- (2) Aircraft carrying Heads of States on their official visits,
- (3) The aircraft that belong to our national state establishments and organizations, (Except for aircrafts of state / foundation universities and aircraft used within the scope of service procurement contracts of public institutions and organizations.)
- (4) Aircraft returning to the airport of departure (If the parking exceeds 24 hours, the parking fee and lighting fee, if any while departing, is charged from the time of landing),
- (5) Aircraft which are not able to take off due to meteorological reasons or any malfunction on the airport systems / services limited to the flight prohibition period,
- (6) Aircraft executing test and practice flights (provided that the airport authority is notified in advance and the departure/landing airport is the same/except for parking),
- (7) Non-commercial flight of Turkish Aviation Association,

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. If air carriers transport their own passengers by renting aircraft belonging to another air carrier, the fees in the tariff are paid to the Airport Operator by the air carrier renting the aircraft.
- c. If the arriving and departing airlines are different, approach, landing, and landing lighting fees are charged to the arriving airline, while parking and takeoff lighting fees are charged to the departing airline.
If the registration/operator is changed during the parking process, the part of the parking fee before the registration/operator change date is taken from the arriving airline, and the part after the registration/operator change date is taken from the departing airline.
- d. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- e. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR PASSENGER SERVICE

1. SCOPE:

This tariff contains the charges and the principles of application about the services and facilities provided at the terminals for departing passengers at the airports/terminals operated by the Airport/Terminal Operators within the scope of Public Private Partnership (PPP) projects tendered by the General Directorate of State Airports Authority (DHMI).

2. PRICING SCHEDULES:

a. International Passenger Service Tariff

AIRPORT	International Passenger Service Charge		International Passenger Security Charge	
	Passenger	Transit/Transfer Passenger	Passenger	Int'l/Int'l Transit/Transfer Passenger
	A	B	C	D
	CHARGE (Euro)			
İstanbul	20,00	5,00	3,00	2,00
Esenboğa	17,00			
Çukurova	15,00			
Antalya				
Adnan Menderes				
Milas Bodrum				
Muğla Dalaman				
Zafer	10,00	3,33	2,00	1,00
Gazipaşa Alanya	12,00	4,00		
Zonguldak Çaycuma	10,00	2,00		

b. Domestic Passenger Service Tariff

AIRPORT	Passenger Service Charge		Passenger Security Charge
	Passenger	Transit/Transfer Passenger	Passenger
	A	B	C
	CHARGE (Euro)		CHARGE (TL)
İstanbul	3,00	1,00	11,80
Esenboğa			
Çukurova			
Antalya			
Adnan Menderes			
Milas Bodrum			
Muğla Dalaman			
Zafer	2,00	0,67	4,10
	CHARGE (TL)		
Gazipaşa Alanya	68,60	20,60	4,10
Zonguldak Çaycuma	54,90	20,60	

3. PRINCIPLES OF APPLICATION:

- a. At the airports, "In return for the services and facilities provided at the terminals", each departing passenger using the terminal is charged the fees in the 2. Pricing Schedules according to the direction of departure.
- b. Charges are based on the declarations in the Load and Trim Sheet or other relevant documents to be submitted to the Airport/Terminal Operator by the air carriers or the ground handling companies with which they have made an agreement.
- c. **Passenger Service Fee:** The fee charged by airport/terminal operators for the services and facilities provided to departing passengers at the airport/terminal.
- d. **Transit Passenger:** Passengers departing from the airport on the same or different flight but with the **same flight number**. These passengers would be charged if they use the terminal.
- e. **Transfer Passenger:** Passengers departing from the airport within 24 hours on the same or different flight but with **different flight number**. These passengers would be charged if they use the terminal.
- f. **Passenger Security Charge:** The fee charged by Airport/Terminal operators for security services provided to departing passengers using the Airport/Terminal.
- g. For each departing PetC (pet carried in the cabin), 30% of the passenger service fee and for Avih (pet carried in the under-flight baggage), 50% of the passenger service fee is charged. ½ of the revenues generated at Istanbul, Antalya, Esenboğa, Adnan Menderes, Dalaman, Milas Bodrum Airports/Terminals, 1/3 of the revenues generated at Çukurova Airport from the aforementioned revenue item are paid to DHMI.

The following fees are collected from the airline organizations/representatives by the airport/terminal operators per each departing passenger.

h. Domestic Passenger Service Fee;

- ✓ At the airports with direct domestic flights,
- ✓ At the first departure Airport for connecting flights,
- ✓ At airports where domestic or international flights arrive and exceed the Stopover (24-hour stopover) period and domestic flights are resumed,

i. International Passenger Service Fee;

- ✓ At the Airports with direct international flights,
- ✓ At the last airport with a domestic connection and departure from abroad,
- ✓ At the airport that arrives with an international connection and continues as an international connection by exceeding the Stopover (24-hour stopover) period,

j. Domestic Transit/Transfer Passenger Service Fee;

- ✓ At connecting airports with domestic or international connections, where the stopover (24-hour stopover) period is not exceeded and the terminal is used to continue as a domestic route,

k. International Transit/Transfer Passenger Service Fee;

- ✓ At airports where international connections arrive and continue as international flights without exceeding the stopover (24-hour stopover) period and using the terminal,

l. Domestic Passenger Security Fee;

- ✓ At the Airport with direct domestic flights,
- ✓ At the first departure Airport for connecting flights,
- ✓ At airports with domestic or international connections that exceed the stopover (24-hour stopover) period and domestic flights are resumed,

m. International Passenger Security Fee;

- ✓ At the Airports with direct international flights,
- ✓ At the last airport with a domestic connection and departure from abroad,
- ✓ At an airport that arrives with an international connection and continues as an international connection by exceeding the stopover (24-hour stopover) period,

n. International/International Passenger Security Fee;

- ✓ At an airport that arrives with an international connection and continues as an international connection without exceeding the stopover (24-hour stopover) period,

2026 TARIFF FOR PASSENGER SERVICE

- o. At Antalya, Milas Bodrum and Adnan Menderes Airports, ½ of the revenues obtained from Domestic and International Transit/Transfer Passenger Fees and Passenger Security Fees in 2. Pricing Schedule to be collected by Airport/Terminal Operators from Airlines or their representatives are paid to DHMI.
- p. **At Muğla Dalaman Airport**, ½ of the revenues obtained from Domestic Transit/Transfer Passenger Fees, International Transit Passenger Fees and Passenger Security Fees in 2. Pricing Schedule (excluding the International Transfer Passenger Service Fee charged to passenger arriving from international route and continuing to international route) are paid to DHMI.
- q. **At Istanbul Airport;**
- ✓ EUR 3,00 of the International Passenger Service Fee, corresponding to the Domestic Passenger Service Fee, to be collected by Incumbent Company,
 - ✓ ½ of the Domestic Transit/Transfer fee for passengers arriving from domestic or international routes and continuing from Istanbul Airport into the country and,
 - ✓ ½ of the Passenger Security Fees in the 2. Pricing Schedule to be collected by Incumbent Company are paid to DHMI during the contract period.
- r. **At Çukurova Airport;**
- ✓ 1/3 of the revenues obtained from International/International Transit/Transfer Passenger Security Fee and Domestic Passenger Security Fee in 2. Pricing Schedule collected from the Airline Organizations/Representatives by the Airport Operator are paid to DHMI.
- s. At Muğla Dalaman Airport, the international transfer passenger service fee belongs to the Tennant Company, and at Zafer, Gazipaşa Alanya and Zonguldak Çaycuma Airports, transactions regarding domestic/international transit/transfer passenger fees and passenger security fees are carried out according to the agreements.
- t. In case there is more than one discount in the tariff that reduces the unit prices, only the proportionally largest of the discounts in the same service item is applied.
- u. Flights made by aircraft of foreign air carriers within the country are considered as international flights and fees are charged accordingly.
- v. **The charges are not applied under the following conditions:**
- (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes,
 - (2) Passengers of the aircraft carrying Heads of States on their official visits,
 - (3) Passengers of aircraft belonging to public institutions / organizations of our country (except for the passengers of the aircraft of state / foundation universities and the aircraft used within the scope of service procurement contracts of public institutions and organizations),
 - (4) Passengers of the aircraft that return to the airport of departure and take off again, (Provided that passengers do not disembark from the aircraft)
 - (5) Passengers of the aircraft making a technical landing (Provided that passengers do not disembark from the aircraft, they are exempted during the technical landing even if they arrive at Türkiye)
 - (6) Due to meteorological reasons or malfunctions in airport systems / services; passengers of aircraft that cannot land at the planned airport and land at another airport and will then return to the departure airport or go to DHMI Airport where the planned actual landing will be made,
 - (7) Passengers of the foreign military aircraft on condition of reciprocity,
 - (8) Members of foreign states with diplomatic status on condition of reciprocity,
 - (9) Passengers below age of two (up to and including age two),
 - (10) Aircraft crew and back-up crew included in the crew list of air carriers. (Those specified in the Regulation on the Principles for the Issuance of Aircraft Crew Certificates)
 - (11) Aircrew who will take over the aircraft for the rest of the flight, or who will take over the aircraft and return to and from duty with a pass ticket. (Those specified in the Regulation on the Principles for the Issuance of Aircraft Crew Certificates)

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. Passenger Service and Security Fee is paid by the air carriers to Airport / Terminal operator.
- c. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- d. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR SAFETY PRECAUTION**1. SCOPE:**

This tariff contains the charges and the application of principles regarding the safety precaution services provided to the aircraft by the ARFF unit with the fire extinguishing vehicle and team at the airports operated by the Airport Operators within the scope of PPP Projects tendered by DHMI General Directorate

2. PRICING SCHEDULES:

INTERNATIONAL FLIGHTS	DOMESTIC FLIGHTS
CHARGE (Euro/Hour)	CHARGE (TL/Hour)
A	B
273,29	5.866,00

3. PRINCIPLES OF APPLICATION:

- a. It is mandatory for aircraft refueled and with passengers on board to take safety precaution service.
- b. The safety precaution fee is charged according to the departure direction (domestic or international) of the domestic airline's aircraft
- c. For the first provision of a safety precautionary service, a full fee of one hour is charged. In case of exceeding one hour, ½ of the fee in the table is charged for every additional 30 minutes.
- d. For foreign registered aircraft leased by public institutions, provided that a permit is obtained from the Directorate General of Civil Aviation, the domestic fee in column "B" of the table is applied following their first entry into Türkiye.
- e. **The charges are not applied under the following conditions:**
 - (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes
 - (2) Aircraft carrying Heads of States,
 - (3) Aircrafts belonging to public institutions / organizations of our country, (Except for the aircrafts of state / foundation universities and the aircrafts used within the scope of service procurement contracts of public institutions and organizations),
 - (4) Foreign military aircraft on condition of reciprocity,
 - (5) Aircraft flying for the purpose of controlling navigation aids,
 - (6) Services provided to aircraft in emergency situations.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR AIRCRAFT / VEHICLE MARSHALLING

1. SCOPE:

This tariff contains the charges and the principles of application regarding the guidance (Follow-Me/Follow the Green) services provided to aircraft and land vehicles at the PAT areas (runway, apron, taxiway) at the airports operated by the Airport Operators within the scope of PPP projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

a. Charges for the Aircraft (Follow-me / Follow the Green):

INTERNATIONAL FLIGHTS	DOMESTIC FLIGHTS
CHARGE (Euro)	CHARGE (TL)
112,35	2.709,00

b. Charges for the Land Vehicles (Follow-me / Follow the Green):

FOR EACH VEHICLE SERVICE GIVEN
CHARGE (TL)
2.709,00

3. PRINCIPLES OF APPLICATION:

- a. The provisions of "SHY-22 Airports Ground Handling Regulation" and "DHMI Airports Follow-me and Marshalling Services Directive" are applicable in the implementation of this tariff.
- b. Follow Me service and Follow The Green system at Istanbul Airport are mandatory for international flights and optional for domestic flights during operation periods.
- c. For safety reasons, follow-me service is mandatory at PAT fields in the following cases:
 - (1) Aircraft carrying flammable, combustible and explosive materials within the PAT areas of airports and land vehicles loading-unloading these aircraft,
 - (2) Land vehicles such as Temporary Apron Vehicle with private license plate, which will pass through critical areas and reach the aircraft, (as instructed by the Airport Operator)
- d. In the event that follow-me vehicle is requested during the towing service provided to the aircraft, the fee is charged according to the tariff table of 2.a. For foreign registered aircrafts, international and domestic tariffs are applied for Domestic registered aircrafts.
- e. The fees in this tariff are charged per aircraft/land vehicle serviced.
- f. **The charges are not applied under the following conditions:**
 - (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes
 - (2) Aircraft carrying Heads of States on their official visits,
 - (3) Aircrafts belonging to public institutions / organizations of our country, (Except for the aircrafts of state / foundation universities and the aircrafts used within the scope of service procurement contracts of public institutions and organizations),
 - (4) Land vehicles of non-commercial public institutions and organizations,
 - (5) Foreign military aircraft on condition of reciprocity,
 - (6) Aircrafts that do not qualify as commercial air carriers and that come to Türkiye specifically for sporting purposes,
 - (7) Funeral and patient transportation vehicles.
 - (8) To aircraft served under the instructions of DHMI Air Traffic Control Unit in order to solve possible problems related to aircraft ground traffic.
 - (9) In the event that the airport authority is required to provide a follow-me service for aviation safety reasons due to the airport's infrastructure and/or inactive facilities/equipment.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR EXTENSION OF AIRPORT WORKING HOURS

1. SCOPE:

This tariff contains the charges and the principles of application regarding the extension of the working days and hours of the airport to be applied to aircraft flying outside the working days and hours when the airport is open for flight operations at airports operated by the Airport Operators within the scope of PPP projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

AIRPORT	INTERNATIONAL	DOMESTIC
	CHARGE (Euro)	CHARGE (TL)
Aydın Çıldır	1.029,50	10.012,00
Zonguldak Çaycuma		
Gazipaşa Alanya		
Zafer	1.286,88	12.508,00

3. PRINCIPLES OF APPLICATION:

- The fee for extending the airport operating hours is charged in addition to the fees in the "Landing and Parking Tariff" for each air carrier requesting and /or benefiting from the extension of the operating hours, in case the airport is requested to be opened for flight operations outside the operating days and hours announced on the DHMI website www.dhmi.gov.tr, in case of delays, additional flights or as a reserve airport even if it is not landed.
- The extension of the airport working hours is based on the landing time for the arrival of the aircraft and the engine start time for the departure of the aircraft.
- Requests for extension of airport working hours are made in accordance with the application principles regarding Airport Working Hours on the DHMI website "www.dhmi.gov.tr".
- For the flight that took place;
 - If the airport is closed for landing or take-off in one direction, the fee determined in the pricing schedule is charged,
 - If the airport is closed for landing and take-off in both directions, the fee specified in the tariff table is charged with a 100% increase.
 - If the time between the landing and take-off of the aircraft is more than 3 (three) hours and the airport is closed during this period, the fee in the tariff table is applied with a 150% increase.
- If the landing/take-offs requested for the hours when the airport is closed are realized during the hours when the airport is open, the fee in the table is charged.
- If there is a difference between actual flight times and request for extension of airport working hours, an additional 10% of the fee in the pricing schedule is charged for each exceeding hour. In the calculation of exceeding periods, periods of one hour or less are taken as one hour.
- In case the cancellation request for the extension of the working hours of the airport is not notified or notified after the opening time, the fee in the pricing schedule is accrued with a 100% increase.
- An "Extension of International Airport Working Hours" fee is charged for aircraft whose arrival or departure airport is abroad.
- In the event that more than one aircraft belonging to the air carrier requesting the extension benefits from the extension of airport working hours, the fees in the table are charged separately for each aircraft.
- Charges are based on the flight purpose stated in the permit or flight plan obtained from the Directorate General of Civil Aviation.
- 50% of the fees in the tariff is applied to the aircraft of flight training schools that provide flight training.

l. The charges are not applied under the following conditions:

- Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes.
- Aircraft carrying Heads of States on their official visits,
- Aircraft carrying military aid material to Republic of Türkiye,
- Aircrafts belonging to public institutions / organizations of our country, (Except for the aircrafts of state / foundation universities and the aircrafts used within the scope of service procurement contracts of public institutions and organizations),
- Foreign military aircraft on condition of reciprocity,
- Aircraft returning to the airport of departure upon the request of official authorities or due to technical reasons,
- Aircraft that are unable to take off (limited to the flight prohibition period) or return to the airport of departure due to meteorological reasons or any malfunction on the airport systems / services,
- In case of delays or disruptions due to security, customs, official procedures,

4. PAYMENT OF THE CHARGES:

- The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- If air carriers transport their own passengers by renting aircraft belonging to another air carrier, the fees in the tariff are paid to the Airport Operator by the air carrier renting the aircraft.
- For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR PASSENGER BOARDING BRIDGE SERVICES

1. SCOPE:

This tariff contains the charges and the principles of application regarding the passenger boarding bridges, 400 Hz power, air conditioning services (PCA) water and VDGS facility services provided by the Airport/Terminal Operators in compliance with the Airports Passenger Boarding Bridges and Equipments Operations Directive to the aircraft docking to the passenger boarding bridges located at the airports and terminal buildings operated by the Airport/Terminal Operators within the scope of PPP projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

a. İstanbul Airport

Maximum Take-off Weight/Mass of the Aircraft	PASSENGER BOARDING BRIDGE (30 Minutes)		400 Hz POWER (Per Minute)		WATER (Per each usage)	PCA (Per Minute)		VDGS

c. Charges for Çukurova, Esenboğa, Dalaman International, Milas Bodrum International Passenger Boarding Bridge Services:

Maximum Take-off Weight/Mass of the Aircraft	PASSENGER BOARDING BRIDGE (30 Minutes)		400 Hz POWER (Per Minute)		WATER (Per each usage)	PCA (Per Minute)		VDGS		
A	B		C		D	E		F	G	
CHARGE (Euro)								TL	Eur	
Kg	INTERNATI ONAL	DOMESTIC	INTERNATIONAL	DOMESTIC	INTERNATIONAL /DOMESTIC	INTERNATIONAL	DOMESTIC	DOM.	INT.	
0 - 50.000	59,38	30,04	2,15	1,09	21,89	0,63	0,33	446	10	
50.001 – 75.000	77,62	40,06				36,49	1,10			0,58
75.001 – 106.000	100,16	50,08								
106.001 -152.000	129,51	64,75			0,91					
152.001 -212.000	187,81	94,08			1,35	0,67				
212.001 -300.000	221,80	111,25								
300.001 and over	248,99	124,85								

3. PRINCIPLES OF APPLICATION:

- a. Passenger Boarding Bridge Services fees are calculated based on the maximum take-off weight of the aircraft as specified in the Registration Certificate and/or Noise Certificate. In the absence of these documents, Load and Trim Sheet is taken as basis. Fractions of take-off weights are rounded up to 1000 kg.
- b. Passenger Boarding Bridge Service fees are charged as domestic/international according to the direction of the aircraft. For aircraft towed from the bridged parking position, the passenger bridge usage fee is charged as domestic/international according to the direction of arrival of the aircraft.
- c. Passenger bridge service time starts when the aircraft is parked and ends when push-back starts.
- d. The charges for 400 Hz power and air conditioning services (PCA) provided at the passenger boarding bridges are charged according to the duration of use.
- e. Passenger boarding bridge fee is calculated for each half-hour based on the half-hourly rate specified in the table. Times under half an hour are taken as half an hour.
- f. The duration of the 400 Hz power and PCA service provided to the aircraft at the Passenger Boarding Bridge starts when the systems are connected to the aircraft and ends when they are removed from the aircraft. If the 400 Hz power and PCA requirement is met by connecting two cables/air ducts, the fees in the table are increased by 50%, if three cables/air ducts are connected, the fees are increased by 100% and if four cables/air ducts are connected, the fees are increased by 150%.
- g. 400 Hz power, PCA, VDGS (Visual Docking Guidance System) and water services are provided by the Airport/Terminal Operator. Fees for these services are charged in return for utilizing the system. Even if the 400 Hz electrical and water systems are operational, if the services in question are obtained from another provider, a fee will be charged for the 400 Hz electrical system and the passenger bridge service for the duration of the service, and for the water systems, a fee will be charged as specified in the tariff. With the exception of this situation, the services in the tables are not charged for the type of service not provided.
- h. Aircraft making a technical landing or returning from the take-off point to the bridge aircraft parking area or blocking the bridge due to a technical malfunction at the moment the aircraft leaves the bridge with push-back will be charged 70% of the passenger boarding bridge fee.
- i. Aircraft that do not qualify as commercial air carriers, that do not take off and land cargo, mail or passengers coming to Turkey for touristic or sportive purposes, and those within the scope of these aircraft that make technical landings are charged 50% of the passenger bridge fee.
- j. If the duration of stay on the bridge exceeds two hours, the passenger boarding bridge fee is increased by 25% for each half hour exceeded. However, if the aircraft arriving at the bridge as the last flight, after the end of the bridge service period, stays/be stayed on the bridge due to its own request or due to the unavailability of the open parking position, 50% of the bridge fee is applied for the duration of the stay.
- k. For parking positions with two or three bridges, in case that both bridges are used at the same time by the Airline, 20% of the normal bridge charge in the tariff (depending on the tonnage) is applied additionally as the charge for the second bridge according to usage time. In the situation of the usage of third bridge at the same time, %20 of the third bridge fees is applied additionally as the charge for the third bridge according to usage time.
- l. If the passenger bridge is available, aircraft that have docked at the bridge before scheduled time but are waiting without bridge service are charged 25% of the "Passenger Boarding Bridge Fee" for the period before the scheduled time.
- m. At Istanbul, Antalya, Esenboğa, Adnan Menderes, Dalaman, Milas Bodrum Airport/Terminals, where there is no revenue item under the name of VDGS in the Lease/Application/Concession agreements and annexes concluded between DHMI and Airport/Terminal Operators, ½ of the VDGS Service Revenues obtained, and at Çukurova Airport, 1/3 of such revenues are paid to DHMI.
- n. **The charges are not applied under the following conditions:**
 - (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes.
 - (2) Aircraft carrying Heads of States on their official visits,
 - (3) Aircrafts belonging to public institutions / organizations of our country, (Except for the aircrafts of state / foundation universities and the aircrafts used within the scope of service procurement contracts of public institutions and organizations),
 - (4) Foreign military aircraft on condition of reciprocity,
 - (5) Passenger Boarding Bridge fee related to any aircraft that could not take off due to meteorological conditions or in case the RWYs are closed to air traffic for any reason for a duration exceeding 2 hours,
 - (6) In the event that the duration of the stay on the bridge exceeds two hours due to the tower not granting the engine start permit although the air carrier has completed all procedures and requested the engine start permit, no additional fee will be charged for the exceeding period.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. The fees stated in this tariff are collected from the airline company or its representative.
- d. In the event that departure and arrival airline companies are different, passenger boarding bridge fees are charged to the airline company, of which departure flight number belongs to.
- e. The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.

2026 TARIFF FOR GROUND HANDLING SERVICES

1. SCOPE:

This tariff covers charges and the principles of application to be paid to Airport Operators by organisations/companies such as -as referred to in the SHY-22 Airports Ground Handling Regulation- ground handling organizations with A, B and C group operating licenses that provide ground handling services to aircraft operating international flights, air carriers operating international flights and performing ground handling services for themselves as permitted under Regulation SHY-22, aircraft line maintenance service providers holding SHY- 145 authorization certificate, in return for the right to provide services at airports operated by Airport Operators within the scope of PPP Projects.

2. PRICING SCHEDULES:

301 and over	14,59	273,31	117,14	59,03			

3. PRINCIPLES OF APPLICATION:

- a. In the application of this tariff, the provisions of “SHY-22 Airports Ground Handling Regulation” are applied. In case of any change in “Regulation on Airports Ground Handling (SHY-22)” within the year, changes made are applied.
- b. Passenger aircraft are classified based on seat capacity and cargo aircraft are classified based on maximum take-off weight. Aircraft carrying only baggage and no passengers are considered cargo aircraft. Ton fractions regarding maximum take-off weight of cargo aircraft are rounded up to 1.000 kg.
- c. For domestic flights of domestic air carriers from domestic to international destinations and from international destinations to domestic destinations, 50% (one way) of the fees in Pricing Schedule 2.a and 2.b of the tariff is applied.
- d. Passenger Services fee is not charged for flights with no passengers on both landing and take-off. In one-way application, if the international flight of the aircraft is empty (there are no passengers subject to the fee), no passenger services fee is charged.
- e. In the event that any of the compulsory ground services (Ramp, Passenger Services, Cargo Control and Communication, Cargo and Mail Services) are performed partially, the fee determined for that service type is charged in full, since the service is deemed to be provided in full.
- f. For the cargo carried on passenger and cargo aircraft (excluding mail, passenger baggage and passenger accompanying goods), 5,62 Euro per ton is paid to the Airport Operator in return for cargo loading, unloading and transportation services on the apron. For transit/transfer cargoes, one-way fees are collected only for arrival cargoes. In the calculation, tone fractions are rounded up to one higher ton in monthly total. This fee is applied with a 25% increase at Çukurova and Zafer Airports, and 7,03 Euro at Istanbul Airport.
- g. Aircraft private security service and inspection organizations are charged 5% of the invoice amount issued to air carriers.

2026 TARIFF FOR GROUND HANDLING SERVICES

- h. Aircrafts making technical landing at airports other than İstanbul Airport without loading and unloading passengers and cargo; Passenger Services fee is not charged, 50% of the ramp fee is charged. In the event that aircraft passengers are taken to the transit hall, 50% of the fees in Table 2.a for passenger traffic service and all fees for other compulsory service types are fully charged. If the passengers wait inside the aircraft without being taken to the transit lounge, Passenger Services fee is not charged. Fees are applied without discount for the aircraft that fails to take off immediately after the issue causing the technical landing is eliminated.
- i. Charges for technical landings are based on the flight purpose stated in the permit or flight plan obtained from the Directorate General of Civil Aviation.
- j. Ground Handling Companies that wash aircraft on the apron are charged 82,35 Euro for narrow-body aircraft and 154,42 Euro for wide-body aircraft in return for providing service. At Zafer Airport, Çukurova Airport and İstanbul Airport, this fee is applied with a 25% increase. ½ of the fee collected at İstanbul Airport is paid to DHMI during the contract period.
- k. Aircraft using the Compass Calibration area are charged 343,85 Euro (in addition to the Towing fee). This fee is applied with a 25% increase at Zafer and İstanbul Airport. ½ of the fee collected at İstanbul Airport and 1/3 of the fee collected at Çukurova Airport shall be paid to DHMI during the contract period.
- l. Catering received by air carriers during domestic flights for their next international flights is charged at the airport where the catering is received.
- m. A fee of 303,66 € is charged for narrow-body aircraft and 455,49 € for wide-body aircraft using the Engine Test Area for up to 1 hour. For each additional 2 hours, a fee of 101,22 € for narrow-body aircraft and 151,83 € for wide-body aircraft is charged. At İstanbul Airport, ½ of the revenue generated from the service and at Çukurova Airport, 1/3 of the revenue generated from the service is paid to DHMI during the contract period.
- n. **The charges are not applied under the following conditions:**
 - (1) In the event that ground handling services are provided free of charge by the companies to the aircraft carrying aid material for the purpose search and rescue, natural disasters, humanitarian aid and etc etc. upon the instruction of Ministry of Transport and Infrastructure,
 - (2) In the event that ground handling companies provide service free of charge to the aircraft declared/notified to be an exception upon the instruction of Ministry of Transport and Infrastructure,
 - (3) For ground handling services to be provided again to aircraft returning from the point of departure to the parking lot or to the airport of departure following take-off upon the request of the competent authorities,
 - (4) In the event that air carriers provide representation, supervision and management, aircraft private security services and supervision, flight operation, aircraft line maintenance and load control and communication services in whole or in part to their own aircraft by obtaining an operating license, only for these services,
 - (5) Foreign military aircraft on condition of reciprocity.
 - (6) Aircraft line maintenance and flight operation fees accrued for aircraft carrying Heads of State on official visits.
 - (7) Fees to be paid to the Airport Operator for ground handling services on domestic flights.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- b. The charges in this tariff are paid to Airport Operator by the persons and / or agents providing ground handling services.
- c. On international flights; in the event that the airline companies, which provide aircraft line maintenance and flight operation services for their own aircraft by obtaining an operating license, perform the aforementioned services for the other air carrier in special cases permitted by Regulation SHY-22, the service fee are charged and invoiced to the air carrier providing the service, and in the event that the aforementioned services are provided by a maintenance organization authorized within the framework of the Regulation on SHY-145 Approved Aircraft Maintenance Organizations, the service fee are charged and invoiced to the organization holding the authorization certificate.
- d. If the arrival/departure airline company is different and the arrival and departure airline company is served by a different ground handling company, separate invoices will be issued to the organizations providing arrival and departure services, with 50% of the fees in the tariff for each direction of the flight.
- e. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- f. VAT is not included in the fees in the tariff.

2026 TARIFF FOR REFUELING CONCESSION**1. SCOPE:**

This tariff contains the charges and principles of application about the Airport Operator share to be collected from the companies providing fuel supply services at the airports operated by the Airport Operators within the scope of PPP Projects tendered by DHMI General Directorate from the revenues they provide in return for this concession.

2. PRICING SCHEDULES:

AIRPORT	FROM THE FUEL SOLD WITH CUSTOMS DUTY	FROM THE FUEL SOLD WITHOUT CUSTOMS DUTY/TRANSIT
	Concession Charge (1.000 Liters)	
	(TL)	(Euro)
İstanbul	7,92	6,69
Çukurova	8,76	6,42
Zonguldak Çaycuma, Gazipaşa Alanya, Aydın Çıldır	7,00	5,14
Zafer	8,70	6,41

3. PRINCIPLES OF APPLICATION:

- a. For the fuel supplied to the aircraft by the fuel supply companies as a basis for the calculation of the fuel supply privilege fee; a copy of the delivery notes issued in accordance with the provisions of the V.U.K., daily sales lists and monthly invoice list are submitted to the Airport Operator each month within the first three business days of the following month. Daily sales lists contain minimum information such as airline company to which fuel is sold, aircraft registration, amount of fuel sold with and without customs (liters), delivery date, airport, declaration of the discount amount applied to airline carriers on the basis of supply company, etc. The daily sales lists and the declaration of the monthly invoice list shall bear the company stamp and authorized signatures. Any fraction below 1.000 liters in the monthly total are rounded up to the next higher 1.000 liters.

b. The charges are not applied under the following conditions:

- (1) Aircrafts carrying aid material and personnel, disaster victims and their companions for search and rescue, natural disasters or humanitarian aid purposes
- (2) Aircraft carrying Heads of States on their official visits,
- (3) Aircraft carrying military aid material to Republic of Türkiye,
- (4) Aircrafts belonging to public institutions / organizations of our country, (Except for the aircrafts of state / foundation universities and the aircrafts used within the scope of service procurement contracts of public institutions and organizations),
- (5) Aircrafts belonging to the Turkish Aviation Association that do not operate for commercial purposes.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- b. Fees specified in this tariff are paid to the Airport Operator by companies delivering fuel oil.
- c. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- d. VAT is not included in the fees in the tariff.

2026 TARIFF FOR APRON VEHICLE PRIVATE PLATES

1. SCOPE:

This tariff contains the charges for and principles of application regarding the vehicle special license plates that must be obtained from the Airport Operator in order to serve the vehicles that will serve in the PAT areas at the airports operated by the Airport Operators within the scope of the PPP Projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

2026 TARIFF FOR APRON VEHICLE PRIVATE PLATES

b. Charges for Temporary Apron Vehicle Private Plate:

TYPE OF THE VEHICLE	AIRPORT			
	İstanbul	Çukurova	Gazipaşa Alanya, Zonguldak Çaycuma, Aydın Çıldır	Zafer
	CHARGE (TL/Day)			
All vehicle	381,00	324,00	149,00	185,00

3. PRINCIPLES OF APPLICATION:

- a. The issuance and applications of Apron Vehicle Special License Plates are carried out in accordance with the procedures and principles in Airports Ground Handling Regulation (SHY-22) and DHMI Airport Directive on Apron License Plate.
- b. In the event that there are more than the number of vehicles required to be kept at the airports according to Airports Ground Handling Regulation (SHY-22), the Airport/Terminal Operator shall evaluate whether or not to issue license plates according to the need and requirement of the service, and license plates shall be issued to those deemed appropriate.
- c. For non-towing electric vehicles (not using fossil fuels) operated by a driver, the initial issuance and renewal fees for Apron Vehicle Special Plates, 50% of the fees specified in table 2.a are applied.
- d. For vehicles, tools and equipment not included in the table, the fee for the closest similar is applied.
- e. Vehicles produced for the purpose of carrying passengers on the airside (Cobus, etc.) are charged as passenger buses regardless of the number of seats.
- f. If the vehicles that have received license plates are out of service for a long period of time for any reason, this does not prevent the Apron Vehicle Special License Plate fee from being collected.
- g. In case the relevant organization fails to notify the Airport/Terminal Operator of the disposed vehicles and does not take them out of the PAT area, the extension fee will continue to be charged.
- h. It is obligatory to return the Apron Vehicle Special License Plate belonging to the vehicle that is taken out of the PAT area for any reason and its activity is terminated to the Airport/Terminal Operator. In this case, no reimbursement will be made for the remaining period.
- i. The license plate of the vehicle for which the extension fee is not paid in January is canceled and the vehicle is taken out of the PAT area. Later, when a license plate is requested for the same vehicle, a new Apron Vehicle Special License Plate is issued by taking the first issue fee.
- j. The validity period of the Apron Vehicle Special License Plate is until December 31st of that year, regardless of the date of initial issuance. Renewals are made every year in January for one year and are valid between January 01 and December 31 of the year to which they belong. In case of extension, there is no obligation to renew the license plate.
- k. In the event that a new model vehicle of the same type and suitable for the same purpose is purchased to replace the vehicle with Apron Vehicle Special License Plate, the license plate of the old vehicle and vehicle identification card are replaced with the new vehicle free of charge, provided that there is a maximum of fifteen days between entry to and exit from the PAT area. The same application is also made for passenger vehicles, which have different information regarding their type registered in the vehicle license by the Traffic, although the purpose and type of use are the same.
- l. For vehicles permitted to be transferred between airports operated by DHMI under Public-Private Partnership Projects or between airports operated by DHMI and airports operated by DHMI under Public-Private Partnership Projects, if the unit price applied is higher at the new airport to which the vehicle is transferred, the difference in the initial issuance and renewal fees are collected separately at the new airport to which the transfer is made.
- m. Vehicles that are sold and transferred to another organization before the validity period expires are charged 40% of the first issue fee of the Apron Vehicle Special License Plate.
- n. In case the Apron Vehicle Special License Plate is requested to be renewed before its expiry date due to loss, damage, obsolescence, etc. or if the Apron Vehicle Special License Plate taken out of the PAT area is not returned, 1.277-TL is charged for the Apron Special License Plate. A fee of 300 TL is charged for renewing vehicle registration cards.
- o. Even if you enter and exit the apron for a very short time, a daily fee is charged. Temporary Apron Vehicle Special License Plate is valid between 00:01 - 24:00.

p. The duration of the temporary Apron Vehicle Special License Plate to be given to the organizations providing permanent service at the airport cannot exceed thirty days for each vehicle within the same year. However, in the event that the vehicle is temporarily out of service due to reasons (breakdown, maintenance, repair, part replacement, etc.), this period is not taken into account for the temporary apron vehicle license plate to be given to the vehicle coming from another airport, if needed.

q. The charges are not applied under the following conditions:

- (1) Temporary license plates for vehicles serving for search and rescue, natural disasters or humanitarian aid,
- (2) The permanent/temporary license plates issued for the vehicles of any public enterprise/state establishments required to work within the apron area without having any commercial feature and/or serving in airports due to the requirements of airport management,
- (3) For the persons and corporations providing service for US military aircraft as per the Law no. 6426,
- (4) For the temporary vehicles to be given to the vehicles of DHMI and terminal operators and public companies/organizations (including General Directorate of Meteorology) at the airports and of the contractors working (construction, good, service),
- (5) For the temporary plates to be given to the funeral and patient transportation vehicles,
- (6) In the event that the Airport/Terminal Operator requests changing the vehicle private plates before expiry of the validity term, no charge is collected.

4. PAYMENT OF THE CHARGES:

- a. Apron Vehicle Private plate charges are collected in advance.
- b. Temporary license plate fees to be requested for third parties by the organizations providing services at the airport shall be collected from the organization providing services at the airport.
- c. In case the request for a Temporary Apron Vehicle Special License Plate is requested by organizations providing services at the airport, the temporary license plate fees are collected monthly in bulk at the end of the month.
- d. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- e. VAT is not included in the fees in the tariff.

2026 TARIFF FOR TERMINAL ELECTRIC TRANSPORT VEHICLE PLATE

1. SCOPE:

This tariff contains the charges for and principles of application for Terminal Electric Transportation Vehicle License Plates to be obtained from Airport/Terminal Operator in order to provide service to the electric transportation vehicles that will serve within the terminal at the airports operated by the Airport/Terminal Operators within the scope of PPP projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

Type of the Vehicle	FIRST ISSUE		EXTENSION	
	AIRPORT			
	İstanbul Zafer Esenboğa Çukurova	Antalya, Adnan Menderes, Dalaman, Milas Bodrum, Gazipaşa Alanya, Zonguldak Çaycuma, Aydın Çıldır	İstanbul Zafer Esenboğa Çukurova	Antalya, Adnan Menderes, Dalaman, Milas Bodrum, Gazipaşa Alanya, Zonguldak Çaycuma, Aydın Çıldır
	CHARGE (Euro)			
Buggy Vehicle and Equivalent	121,27	96,82	18,32	14,81
Battery-operated Wheelchair	90,72	72,41	12,20	9,58
Tricycle Electric Bike				
Two-Wheeler Scooter or Ginger				

3. PRINCIPLES OF APPLICATION

- a. In the application of this tariff, the provisions of the approved "Terminal Electric Transportation Vehicle License Plate Instruction / Directive" are applied.
- b. If the electric vehicles that have received a license plate are out of service for a long period of time for any reason, this does not prevent the Terminal Electric Transportation Vehicle License Plate fee from being collected.
- c. In case the relevant organization fails to notify the Airport/Terminal Operator of the disposed vehicles and does not take them out of the terminal, the extension fee will continue to be charged.
- d. The Terminal Electric Transportation Vehicle License Plate of the vehicle that is taken out of the terminal for any reason and ceased to operate must be returned to the Airport/Terminal Operator. In this case, no refund will be made for the remaining period.
- e. The license plate of the vehicle whose extension fee is not paid in January is canceled and the vehicle is taken out of the terminal. Later, when a license plate is requested for the same vehicle, a new Terminal Electric Transportation Vehicle License Plate is issued with the first issue fee.
- f. The validity period of the Terminal Electric Transportation Vehicle License Plate is until December 31 of that year, regardless of the date of initial issuance. Extension are made every year in January for one year and are valid between January 01 and December 31 of the year to which they belong. In case of extensions, there is no obligation to renew the license plate.
- g. In the event that a new model vehicle of the same type and suitable for the same purpose is purchased to replace the vehicle with the Terminal Electric Transportation Vehicle License Plate, the license plate of the old vehicle will be replaced with the new vehicle free of charge, provided that there is a maximum of fifteen days between entry and exit from the Terminal. Although the purpose and type of use are the same, the same application is also made for electric vehicles for which different information regarding the type is registered.
- h. Vehicles that are sold and transferred to another organization before the validity period expires are not charged during the validity period of the Terminal Electric Transportation Vehicle License Plate. For the transferred vehicle, 40% of the first issue fee is charged in January of the following year. No further extension fee is charged for the period in question.
- i. If the Terminal Electric Transportation Vehicle Plate is requested to be renewed before its expiration date due to reasons such as loss, damage, wear and tear, or if the Terminal Electric Transportation Vehicle Plate is not returned after being removed from the terminal, a fee of 1.277 TL will be charged for the Terminal Electric Transportation Vehicle Plate.

2026 TARIFF FOR TERMINAL ELECTRIC TRANSPORT VEHICLE PLATE

j. At Istanbul, Antalya, Esenboğa, Esenboğa, Adnan Menderes, Dalaman, Milas Bodrum Airport/Terminals, where there is no revenue item under the name of Terminal Electric Transportation Vehicle License Plate Revenues in the Lease/Application/Concession Agreements and annexes concluded between DHMI and Airport/Terminal Operators, ½ of the Terminal Electric Transportation Vehicle License Plate revenues obtained at Istanbul, Antalya, Esenboğa, Adnan Menderes, Dalaman, Milas Bodrum Airport/Terminals and 1/3 at Çukurova Airport are paid to DHMI.

k. **The charges are not applied under the following conditions:**

- (1) License plates given to electric transportation vehicles used in the terminal by public institutions/organizations that provide services at airports and/or have no commercial nature as required by airport management,
- (2) License plates given to vehicles used to serve sick, disabled and elderly passengers,
- (3) If the Airport Operator requests the replacement of the Terminal Electric Transportation Vehicle license plates before the validity period expires, no fee will be charged.

4. PAYMENT OF THE CHARGES:

- a. Terminal Electric Transportation Vehicle License Plate fees are charged in advance.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff.

2026 TARIFF FOR ENTRY CARDS

1. SCOPE:

This tariff contains the charges and principles of application regarding the entrance cards (first issue and extension) that must be used at the entrance of the airport and the driving license at the PAT fields for the personnel of the organizations providing services at the airports/terminals operated by the Airport/Terminal Operators within the scope of the PPP Projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

a. Charges for Entry Card First Issue and Extension:

ALL AIRPORTS	
A	B
	CHARGE (TL)
AIRPORT ENTRY CARD	1.612,00

b. Charges for Temporary Entry Card / Document:

AIRPORT	TERM AND CHARGES FOR TEMPORARY ENTRY CARD/DOCUMENT	
	A	B
	Up to 7 days	Between 8 and 90 days
	CHARGE (TL / Day)	
İstanbul	233,00	In addition to the charge for 7 days; 28,29
Çukurova	252,00	In addition to the charge for 7 days; 31,10
Gazipaşa Alanya, Zonguldak Çaycuma, Aydın Çıldır	206,00	In addition to the charge for 7 days; 23,31
Zafer	262,00	In addition to the charge for 7 days; 31,10

c. Charges for Initial Issuance and Extension of Vehicle Use Certificate for PAT Areas:

ALL AIRPORTS	
A	B
	CHARGE (TL)
Vehicle Use Certificate for PAT Areas	1.612,00

3. PRINCIPLES OF APPLICATION:

- The issuance and application of airport access cards are carried out in accordance with the procedures and principles set out in "SHT-17.1 All Airports Access Card Instruction" and "Airport Access Cards Directive" and SHY-22 Airports Ground Handling Regulation.
- The validity period of the entrance card and Vehicle Use Certificate for PAT areas are until December 31st of the year to which the card belongs, regardless of the date of initial issuance. These documents are renewed every year in January in return for a fee to be valid between January 01-December 31.
- Entrance cards/Vehicle Use Certificate for PAT Areas fee are paid in advance by the relevant organization for the first issue. Even if the card/certificate is not replaced at the end of the period, the annual extension fee is charged in advance.
- Cards/certificates for which the extension fee has not been paid in January are canceled.
- The organization that fails to deliver the card of the employee who has left the job to the Airport/Terminal Operator within 15 days at the latest are charged a fee equal to the cost of the card/certificate.
- Temporary entrance cards are valid between 00.01-24.00
- If the qualification of the PAT Field Vehicle Use Certificate changes due to an increase/decrease in authority, the initial issuance fee will be charged again.
- In cases where the Ministry of Foreign Affairs requests the issuance of a Foreign Official Representative Officer Airport Entry Card but no fee is specified, the Initial Issue and Extension of Permanent Entry Cards fees in 2.a Pricing Schedule are applied.
- If the current cards/vehicle use certificate for PAT areas are requested to be renewed by DHMI/Airport/Terminal Operators before their expiration date or are replaced due to malfunctions not caused by the user, no fee will be charged. For any other

reason, if airport entry cards/vehicle use certificate for PAT areas are requested again during the year from personnel (including those covered by exemptions), a fee of 1,532 TL are charged. If more than one card/certificate is requested for the same personnel during the year, double the fee are charged for the second and subsequent cards/certificates.

- j. In case of personalized printing of temporary entrance cards of one day or more, a card printing cost fee of 126,60 TL is charged in addition to the fees in the table per card.
- k. In case of loss of visitor / temporary entry cards or malfunction due to user error, the fee of 1.612 TL is charged to the person / organization that obtained the temporary entry permit.
- l. If personnel holding a vehicle use certificate for PAT areas are temporarily assigned to another airport, the airport to which they are temporarily assigned will not issue a new certificate. During the extension period, extension procedures will be carried out by the airport that issued the vehicle use certificate for PAT areas to the personnel.
- m. In the event that an airport entry card/vehicle use certificate for PAT areas are requested, but the request is abandoned before the card/certificate are delivered during the execution of the transactions, fee of 1.612 TL is applied.
- n. In the event that it is not deemed appropriate to issue a card to the personnel for whom an entry card application is made, the entry card fee charged for the personnel are offset or refunded for another entry card.
- o. During the reissuance of the card taken back from the personnel who do not comply with the procedures and principles in SHT-17.1 All Airports Entry Card Instruction, Airport Entry Cards Directive and SHY-22 Airports Ground Handling Regulation and the rules applied at the airport, the first annual issuance fee is charged in full each time.
- p. The organization that employs the personnel who do not comply with the security rules and card usage instructions applied at the airport will be charged twice the airport entrance card fee.
- q. **The charges are not applied under the following conditions:**
 - (1) DHMI staff,
 - (2) Staff of the public institutions / organizations whose services are required to be located at the airport and which have no commercial nature
 - (3) For the persons and corporations providing service for US military aircraft as per the Law no. 6426,
 - (4) Personnel of diplomatic and consular missions who are notified by the Ministry of Foreign Affairs to be given free cards within the scope of reciprocity,
 - (5) Pilots, academicians and students of non-commercial educational institutions,
 - (6) Temporary entry cards to be issued for the driver and technical staff of the vehicles entering into PAT areas by obtaining Temporary Apron Vehicle Special License Plate,
 - (7) Personnel of non-commercial public institutions and organizations conducting scientific, health, etc. studies and research at airports,
 - (8) Entry cards/documents of the intern students,
 - (9) Temporary entry card / document to be given to the personnel of the contractors who are doing business (construction, goods and services procurement) with DHMI and public institutions / organizations (including the General Directorate of Meteorology) serving at the airport,
 - (10) Temporary entry card / document for those whose temporary entry is deemed appropriate by the Airport Chief Directorate / Directorate as required by the duty / service.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff.
- d. Charges stated in this tariff are collected in advance. From the companies that provide service at the airport on permanent basis, charges for the temporary cards are collected within the first seven days of the following month, in case of request.

2026 TARIFF FOR COMMUNICATION SYSTEM

1. SCOPE:

This tariff contains the charges and principles of application to be applied for the institutions and organizations providing services at the airports/terminals operated by the Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI General Directorate in return for the use of the communication systems and infrastructures of the Airport/Terminal Operators.

2. PRICING SCHEDULES:

SERVICE TYPE	SERVICE PRICE	AIRPORT		
		Antalya Adnan Menderes Milas Bodrum, Muğla Dalaman, Gazipaşa Alanya, Aydın Çıldır, Zonguldak Çaycuma	İstanbul	Esenboğa, Çukurova, Zafer
A	B	C (CHARGE)		
Telephone Installation	The initial installation fee will be charged from the subscribers who benefit from the existing cables of the Airport / Terminal Operation (telephone is provided by the subscriber).	150,00 TL	167,00 TL	180,00 TL
Special Line Installation/Transfer	Price of the materials used and labor costs are collected according to the “ Tools, Equipment, Mate Allocation Tariff ”.			
Telephone Subscription (Annual)	From the beginning of the subscription to the beginning of the year to the end of the same year, the yearly advance is taken. When canceling a subscription, the subscription fee for the unused month will be refunded.	150,00 TL	167,00 TL	180,00 TL
Telephone Call	50% more than the charge applied by the telecommunication company is paid for the local, intercity and international calls			
AFTN Line Rent	For direct connection to the direct system and/or local connection from AIT	130,85 Euro/ Month	170,55 Euro/ Month	163,58 Euro/Month
Line Rental	Connections made using the lines of the Airport / Terminal Operator, which are not subscriptions for external telephone, data, adsl, pos device, fax, TV antenna etc. provided from the telecommunication companies, are taken with each line usage fee.	573,00 TL/Year	649,00 TL/Year	713,00 TL/Year
Announcement	Charge for using the announcement system Collected in advance from the month of subscription commencement to the year end. In subscription cancellation, subscription charge for the months of no use is returned.	214,00 TL/ Month	243,00 TL/ Month	269,00 TL/ Month
Class B Message	For the messages to be sent from DHMI or Airport/Terminal Operator's AFTN circuits; Domestic: 25% more than the domestic telegram charge of Posta ve Telgraf Teşkilatı A.Ş. is applied.			
	International: For each word	0,27 Euro	0,34 Euro	0,32 Euro
DATA Line /Socket*	The initial installation fee	346,36 Euro	450,18 Euro	432,73 Euro
	Usage fee (each data line / socket is used)	337,00 TL/Month	384,00 TL/Month	424,00 TL/Month
Modem/ Switch *	The initial installation fee	346,36 Euro	450,18 Euro	432,73 Euro
	Each modem, switch, etc. used by the Airport/Terminal Operator is charged for usage of network communication and multiplexing devices.	337,00 TL/Month	384,00 TL/Month	424,00 TL/ Month
Wi-Fi Network*	The initial installation fee	346,36 Euro	450,18 Euro	432,73 Euro
	Collected as the charge for Airport/Terminal Operator's Wi-Fi Network usage.	337,00 TL/Month	384,00 TL/Month	424,00 TL/ Month

(*) For the allocation of Wireless Network/Data-Socket/Modem-Switch lines, a monthly usage fee is charged for the use of the existing Airport/Terminal Operator infrastructure (weak current cable system), provided that it is isolated from the Airport/Terminal Operator's corporate internet/intranet network.

3. PRINCIPLES OF APPLICATION:

- a. No change of location or transfer can be made by the subscribers in the areas within the responsibility areas of the Airport/Terminal Operator without the permission of the Airport/Terminal Operators.,
- b. If any damage/failure is caused to the lines and systems by the subscribers, they will be obliged to compensate for this damage/failure.
- c. In the areas within the responsibility of the Airport / Terminal Operator, the private line cannot be installed without the permission of the Airport / Terminal Operator. Devices, systems, apparatus, etc. cannot be installed in these spaces. The fee is determined on a volume basis for those allowed.
- d. In the event that the subscribers connected to the Airport / Terminal Operator's telephone switchboard use parallel telephones, 50% of the subscription fee is charged for the parallel telephone. Furthermore, the line from the Airport Operator's switchboard is connected to the private switchboard, in addition to the subscription fee, switchboard usage fee in the amount of the private switchboard's local line capacity is accrued on this line. Switchboard usage fee is 25% of the annual subscription fee.
- e. Organizations subscribed to the central announcement system can only make announcements related to their own services.
- f. Airline companies and ground service organizations wishing to make announcements through the Information Office of the Airport/Terminal Operator are charged 50% more than the subscription fee.
- g. The offices of non-commercial public institutions/organizations serving at the airports as a requirement of their duties/services are provided with an internal line from the Airport/Terminal Operator's switchboard, provided that the telephone machines are provided by them.
 - (1) Initial installation, fault control and annual subscription fees are not charged for these telephones.
 - (2) These phones can not have a function for making local calls. However, if they are notified in writing in advance of the official telephone numbers that they can call within the city in connection with their services, they can be contacted through the switchboard.
- h. In the event that an internal line is provided over the switchboard of the Airport/Terminal Operator to the officers of the official institutions serving at the airports, who are allocated a lodging within the boundaries of the airport, upon the written application of the institution to which they are affiliated and if the circuit and switchboard capacity is available, provided that all kinds of expenses, labor, etc. are covered by the relevant institution, the call fees are charged from the personnel to whom the line is allocated.
- i. The fees issued by the telecommunication company are charged to DHMI personnel who had the private phone calls.
- j. In case of non-payment of the call charges made through the Airport/Terminal Operator's switchboard, the line will be closed for calls. In order for the line to be reopened, the initial facility fee in the schedule is charged together with the old debt.
- k. For external lines provided by telecommunication companies, if the connection between the outdoor area inside the airport and the terminal building is provided by DHMI/Airport/Terminal Operator's infrastructure (weak current cable system), line rent is charged. In case the Airport/Terminal Operator's infrastructure (weak current cable system) is used for internal data lines within the building, in addition to the line rental fee, an initial installation and usage fee is charged for each DATA line / socket used.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. Initial installation, transfer, relocation, rent, subscription fees breakdown and control fees are charged in advance.
- c. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- d. VAT is not included in the fees in the tariff.

**2026 TARIFF FOR TELECOMMUNICATION SYSTEMS AREA ALLOCATION AND INFRASTRUCTURE
RIGHT OF WAY**

1. SCOPE:

This tariff contains the charges and principles regarding the passage of all kinds of cables and similar equipment used in the communication infrastructure or network infrastructure at airports/terminals operated by Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

a. Communication Infrastructure Right of Way Tariff:

AIRPORT	COMPANIES PROVIDING SERVICE AT THE AIRPORT		TELECOMMUNICATION COMPANIES
	New line installation	Existing Line Usage	
A	B	C	D
(TL/m ² /Year)			
İstanbul	55,58	77,86	2% of the minimum square meter unit value of the real estate subject to real estate tax.
Antalya, İzmir Adnan Menderes, Muğla Dalaman, Muğla Milas Bodrum,	49,42	67,97	
Gazipaşa Alanya, Zonguldak Çaycuma, Aydın Çıldır,	29,32	49,42	
Ankara Esenboğa Çukurova	61,19	85,60	
Zafer	37,05	61,84	

b. Power Infrastructure Right of Way Tariff

AIRPORT	NEW LINE INSTALLATION	EXISTING GALLERY & INFRASTRUCTURE USAGE
	(TL/m/Year) (Per Cable)	
İstanbul	25,78	36,34
Çukurova	28,25	39,91
Gazipaşa Alanya/Zonguldak Çaycuma/Aydın Çıldır	13,57	22,49
Zafer	17,00	28,11

3. PRINCIPLES OF APPLICATION:

- For each electronic communication station that has been granted a security certificate by the Information and Communication Technologies Authority (ICTA), a fee of 5 times the fee determined by the Ministry of Transport and Infrastructure for the site selection certificate for airports in provinces with metropolitan municipalities and 3 times for other airports will be charged in case of allocation at the airport. This fee is the total fee that can be charged for only one BTK security certified station. If the relevant company has more than one BTK security certified station at the airport, the above-mentioned amount will be charged separately for each station.
- It is limited to 3 outdoor antennas and 1 mini link antenna on the tower, container top (open area) and mobile (towed or motorized) base station, and for each antenna to be placed other than this, a separate fee is charged over the fees in the table.
- The passage fee for all kinds of cables and similar equipment used in communication infrastructure or networks is calculated according to the project. Connection cabinets are included in the fee. All manufacturing, installation, costs and expenses related to the use of the right of way shall be made and covered by the telecommunication companies requesting the use of the right of way.

2026 TARIFF FOR TELECOMMUNICATION SYSTEMS AREA ALLOCATION AND INFRASTRUCTURE RIGHT OF WAY

- d. The fees in the tariff are related to the allocation, and all other financial and administrative obligations and all kinds of documents (including licenses) and transactions to be requested by the official authorities, and submission to the relevant authorities and fulfillment of the requirements belong to the Airport/Terminal Operator.
- e. For the energy consumed in the installed devices, an additional fee is charged in accordance with the Electricity, Water, Wastewater, HVAC Tariff.
- f. General Expenses Participation Share (GEPS) is not applied to the above-mentioned fees. However, for area allocations made in closed areas, in addition to the area allocation fee, GEPS is charged at the rate determined in the Terminal Area Allocation Tariff, limited to the m² of the allocated area. No GEPS is charged for electronic communication stations.
- g. The transition fee for all kinds of cables and similar equipment used in the energy infrastructure to be passed through immovable properties other than the locations allocated to the lessee is calculated according to the project. The Energy Infrastructure Right of Way Tariff is applied only for the power lines to be drawn to the areas outside the terminal, to the tenants who obtain electricity as a subscriber to companies other than the Airport/Terminal Operator Incumbent/Tenant Company and to the companies engaged in energy generation and distribution.
- h. In accordance with the permission granted by the Airport Security Commission, if a camera is placed outside the area allocated to the person / organization, a fee of 908,00-TL / month per camera is paid. This fee is increased by 25% at Esenboğa, Çukurova and Zafer Airports and 1.022,00-TL at Istanbul Airport.

4. PAYMENT OF THE CHARGES:

- a. The accrual, invoicing and collection of charges specified in this tariff are applied according to the principles of the regulations of the Airport / Terminal operator.
- b. The charges specified in the Schedule are paid in advance during leasing payment dates specified at the lease contract.
- c. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- d. VAT is not included in the fees in the tariff.

2026 TARIFF FOR POWER, WATER, WASTEWATER, HVAC

1. SCOPE:

This tariff contains the charges and principles regarding the electricity, water, treatment, HVAC services provided to individuals, institutions and organizations at the airports operated by the operating company (hereinafter referred to as Airport/Terminal Operator) contracted with DHMI through Build Operate Transfer (BOT) / Lease.

2. PRICING SCHEDULES:

SERVICE TYPE		SERVICE PRICE
A		B
Active Unit Price (AUP) TL / kWh		It is calculated by adding VAT to the unit price in the invoice issued by the electricity distribution company to the Airport/Terminal Operator.
Reactive Unit Price (RUP) TL / kVArh		It is obtained by adding VAT to the Reactive Unit Price announced by the Energy Market Regulatory Board (EPDK).
Power Consumption Price Calculations (PCP)		It is calculated by adding maintenance expenses, losses, expenses arising from the use of secondary power sources, etc. to the total of Active Consumption Price (ACP) and Reactive Consumption Price (RCP).
		ACP = AUP x Active Consumption Amount RCP = RUP x Reactive Consumption Amount For Zonguldak Çaycuma and Zafer Airport PCP = (AUP+RUP) x 1.30
		(For the other airports / terminals) PCP = (AUP+RUP) x 1.50
Power Distribution Connection Price (TL)		For once from the subscriber to act contract to get electric power from the Airport/Terminal Operator and for each contract in cases of requesting increase in the available connection speed and acceptance of the requested increase by the Airport/Terminal Operator, <ul style="list-style-type: none">Antalya Airport Milas Bodrum Airport Domestic Terminal Dalaman Airport Domestic Terminal Adnan Menderes Airport, Zonguldak Çaycuma Airport, Gazipaşa Alanya Airport and Aydın Çıldır Airport; “distribution connection charge” of 2.510,00 TL is collected.İstanbul Airport; 2.854,00 TLDistribution connection charge, at Çukurova Airport, Esenboğa Airport, Zafer Airport, Milas Bodrum and Muğla Dalaman airports International Terminals is 3.137,00-TL.“Distribution connection charge” is not repaid to the consumer, in case of agreement expiry.In the event that the available systems are not sufficient for the subscribers to participate in the facility, procurement and assembly of additional fitting, cable etc. materials to High Voltage, Medium Voltage and Low Voltage are subscriber’s responsibility. When the subscription ends, equipment, cables, etc. added by the subscriber in high voltage, medium voltage and low voltage systems cannot be taken back by the subscriber.
Water	(TL/m³)	20% more than the unit price of the relevant Municipality / Natural Gas Distribution Company tariff is applied. (VAT Excluded)
Natural gas		
Sewerage Price (TL/m³)		50% of the water consumption price of the lessee is charged. (VAT Excluded)
Hot Water		Hot Water Charge = [(X*K) + (I*1,2)]*M (VAT Excluded)
HVAC (TL/m³)		$F = \frac{A+B+C \text{ (TL)}}{V \text{ (m}^3\text{)}} \text{ (VAT Excluded)}$
Aircraft Cesspit Wastes Treatment (TL)		$Z = R \times F \times S \text{ (VAT Excluded)}$

2026 TARIFF FOR POWER, WATER, WASTEWATER, HVAC

HVAC Operation Costs Calculation (m³):

F: HVAC fee per m³ within the period. (VAT excluded)

A: Fuel consumption price (TL/Period): It is calculated by measuring the amount of fuel consumed during the period. It is calculated by multiplying the highest unit price value (price difference will be included in the unit price) from the fuel bills received during the period. (VAT excluded)

B: Power consumption price (TL/Period): Electric power consumed in heating-cooling-ventilating system within the period is measured with the meter if possible and/or multiplied with the powers of the devices installed in the facility and/or powers of the devices installed in the facility multiplied with total working hours within the period, and calculated in Kw/Period. Total electricity price is found by multiplying with the highest unit price value of the electricity bills received during the period. (VAT excluded)

C: Staff, Spare parts, depreciation and maintenance-repair costs (TL/Period): 42% of total fuel and electricity consumption costs indicated by A and B. (VAT excluded)

V: Volume: Total closed volume of the floors, where HVAC is available of the building where HVAC services are provided is taken into consideration.

* Heights over 4.5 meters are not taken into consideration in calculation.

Aircraft Cesspit Wastes Treatment Operating Cost Calculation:

Operation costs within the period consist of below items:

A: Chemical consumption price

B: Electric consumption price

C: Personnel expenses

D: Total capacity of treatment system = (m³/day) x number of days within the period

E: Depreciation amount calculated within the period (is calculated by taking the cost of the facility as the basis according to the related legislation)

K: Profit coefficient (1.25)

F: Unit cost

R: Waste water amount (According to the vehicle type)

R1: Multiplying coefficient for 1000 l capacity Cesspool Tool 1

R2: Multiplying coefficient for 2000 l capacity Cesspool Tool 2

R3: Multiplying coefficient for 3000 l capacity Cesspool Tool 3

S: Number of vehicles discharging into the treatment system

Y: Total operation cost

Z: Cost forming the basis of accrual

$Y = K (A+B+C+E)$.

Sharing Operation Costs: Operation cost share for the period is calculated depending on the type of tools discharged into the treatment system and number of discharges. Here, unit price is found by dividing total cost to total treatment system capacity. By multiplying the found unit price with the tool capacity discharged into the treatment system and number of discharges, cost forming the basis of accrual is found. Here, total operation cost for the period which is Y is divided by treatment system's total capacity, which is D, and unit price F is found.

$F = Y / D = K (A+B+C+E) / D$

Here, subscribers' operation cost forming the basis of accrual (Z) = amount of subscriber's waste water (R1, R2, R3), unit price (F) and number of tools discharged into the treatment system (S).

$Z = R \times F \times S$

In the event that waste is discharged into waste water system with different cesspool tools at different times, each tool type and discharge number within the period is calculated separately and added, R value found is multiplied with unit price (F), and operation cost (Z) is found.

Example: If discharge with type R1 tool was made for 5 times, with type R2 tool for 7 times and with type R3 for 2 times within the accrual period; $Z = ((1 \times 5) + (2 \times 7) + (3 \times 2)) \times F = 25 \times F$.

Hot Water Operational Cost Calculation:

X = Natural gas fair price/Heating fuel fair price

K = The amount of energy required to heat 1 m³ of water

Lower calorific value of Natural Gas = 8250 k.cal,

Heating fuel lower calorific value = 9700 k.cal,

Boiler efficiency = 0.90

Assuming that the water is heated to 40 degrees and the cold water is 10 degrees, 1 m³ of water at 10 degrees (40-10) = 30 k.cal * 1000 lt = 30*1000 = 30000 k.cal / m³ must be spent in order to obtain 40 degrees of water

$K = (30000/8250) / 0.9 = 4.04$ m³ natural gas/ m³ water (the amount of natural gas required to heat 1 m³ of water)

$K = (30000/9700) / 0.9 = 3.44$ ton heating fuel / m³ water (the amount of heating fuel required to heat 1 m³ of water)

M = The amount of hot water to be read from the meter

I = Water price to be taken from the relevant institution's invoice

Hot Water Fee= $[(X \times K) + (I \times 1,2)] \times M$

3. PRINCIPLES OF APPLICATION:

- a. The electricity fee includes distribution system maintenance, repair, transformer and line losses and electricity costs to be provided from secondary power sources against power outages.
- b. In temporary power allocations, the explanation and unit price formula in line 1 of the 2nd Tariff Table is applied to the energy amount determined according to the installed power and hours used. In addition, in such cases, an hourly technical personnel allocation fee in the Tools, Equipment, Material Allocation and Training Tariff is charged for opening and closing and supervision. In temporary electricity allocations, "distribution connection fee" is not charged, but an assurance fee is charged. The assurance fee is determined by the relevant Airport/Terminal Operator in accordance with the conditions of the day, taking into account the demand power and the duration of electricity usage. The assurance fee shall be reimbursed following the termination of the contract, provided that there is no subscription-related debt to the Airport/Terminal Operator.
- c. Consumers with a single over-supplied infrastructure and all consumers with an installed capacity below 15kW, including 15kW, are exempt from installing a reactive energy meter. All consumers with an installed capacity above 15kW must install a reactive energy meter. Consumers with an installed capacity above 15kW but without a device measuring the inductive-reactive and capacitive-reactive energy drawn from the system shall be charged a reactive energy fee of 0.90 (ninety percent) times the active energy fee in addition to the active energy fee drawn in that period. It is mandatory to install non-returnable latches on reactive energy meters.
- d. Consumers with an installed capacity of less than 50kVA, who are obliged to install a reactive energy metering device, in the event that they consume inductive-reactive energy exceeding 33% of the amount of active energy they draw or supply capacitive-reactive energy to the system exceeding 20% of the amount of active energy, the 1st, 2nd and 3rd lines of the 2. Pricing Schedule are applied.
 Consumers with an installed power of 50kVA and above, who are obliged to install a reactive energy measurement device, in the event that they consume inductive-reactive energy exceeding 20% of the active energy amount they draw or supply capacitive-reactive energy to the system exceeding 15% of the active energy amount, the 1st, 2nd and 3rd lines of the 2. Pricing Schedule are applied.
 For the consumer exceeding both inductive and capacitive limits, the 1st, 2nd and 3rd lines of the 2. Pricing Schedule are applied to the entire consumption of whichever of the inductive and capacitive meters recorded higher consumption.
 In the event that both inductive and capacitive meters do not record consumption, in addition to the price of the active energy drawn in that period, a reactive energy fee equal to 90% (ninety percent) of the active energy is charged.
 The consumer monitors the compensation system for which he/she is responsible and takes the measures himself/herself.
- e. In the calculation of the electricity consumption fee in line A/3 of the 2. Pricing Schedule;
 - a. 50% for tenants operating in the terminal building and using UPS as a backup power source,
 - b. 30% for tenants operating in the terminal building who do not use UPS as a backup power source.
 - c. 25% for the tenants operating at the terminal building and benefitting from the generator / back-up power resources of the airport operator,
 - d. 15% for the tenants operating at the terminal building but not benefitting from the generator / back-up power resources of the airport operator.
- f. All investments regarding electric vehicle charging stations are made by the Airport Operator or the expert subcontractor of the Airport Operator. These stations are operated by the Airport Operator or the expert subcontractor of the Airport Operator. The fee determined for this service cannot be more than the ceiling fee determined by the relevant public authority, or the market market price if there is no ceiling fee determined by the relevant public authority. Electricity consumption are determined by electricity meters to be connected to each charger (AC or DC) and the cost of which shall be borne by the owner. In line with the meter index values, the electricity invoices to be issued to the vehicle charging stations are determined as 30% more for AC devices and 50% more for DC devices than the electricity consumption costs calculated according to Schedule 3.e.
- g. In the event that the water is procured from the wells of DHMI / Airport / Terminal Operator, 20% is added to the total cost of mains water applied by the relevant supplier/municipality for its business subscribers, calculated according to the consumption amount.
- h. In the event that the water is procured from the wells drilled and to be drilled by covering all expenses as per the permission to be obtained from DHMI, 50% of the total cost of the mains water is (including waste water cost, if any) applied by the relevant supplier for its subscribers. In the event that the waste water is invoiced separately for the well water extracted by the relevant supplier, the price to be determined based on the waste water fee calculation system of the relevant organization over the amount of water extracted is additionally charged as waste water fee.
- i. At the airports with central heating and air-conditioning system, when the building's general HVAC system is used at the leased spaces of the lessees without heating device or ventilation channel such as radiator, fan coil, charge is accrued within the framework of the terms determined in the tariff. In case of not using HVAC systems at all (provided that no hot water pipe and canals pass and/or concerned systems at the storerooms, cold storage etc. not requiring heating-cooling are turned off) no charge is accrued.
- j. Companies or lessees that intend to meet their natural gas need by getting natural gas from the existing natural gas line at the airport pay the price to be calculated depending on their own usage capacity over the connection fee, subscription fee, assurance fee, gas meter fee, etc. charged by the relevant organization for bringing the natural gas into the airport

2026 TARIFF FOR POWER, WATER, WASTEWATER, HVAC

boundaries. Natural gas is accrued by adding 20% to the total cost of the natural gas m³ fee applied to subscribers by the relevant organization and calculated according to the amount of consumption.

- k. The fees in this tariff are applied without any increase to the contractors (construction, goods and services) performing works on behalf of the Ministry of Transport and Infrastructure or DHMI at the airports.
- l. Allocations to public institutions/organizations (non-commercial) and their fees are regulated by special protocols.
- m. The electricity, water and wastewater consumption fee of the personnel residing in the lodgings of the organizations working at the airports is applied as follows.

(1) In the calculation of **the power price**, the explanation and unit prices in line 1-A of the 2. Pricing Schedule are applied without any increase.

(2) In case the **water** is supplied from the supplier municipal network, the staff subscribes to the relevant organization. In the absence of an individual water meter, the amount per person is calculated from the invoice amount and accrual is made. However, the residents of the lodgings where water is taken from the DHMI / Airport / Terminal Operator's network and where water is used in common with the facilities belonging to DHMI / Airport / Terminal Operator but a meter cannot be connected due to technical reasons are charged 93,00 TL per person per month. This fee is applied as 107,00 TL at İstanbul Airport. In case the water is supplied from wells at the airport, the water fee is calculated according to the amount of consumption over the unit prices of the water and wastewater fee applied by the relevant supplier / municipality to residential subscribers without any increase.

- n. Electricity, water and natural gas charges for commercial areas serving only DHMI personnel are applied without any increase.

o. The charges are not applied under the following conditions:

- (1) Public institutions/organizations that provide services at airports as part of airport operations and do not have a commercial nature, (except for the fees declared not to be within the scope of exemption in the Presidential Decrees)
- (2) Wastewater fee for tenants whose buildings are built by themselves or who have a detached building allocated to them and whose sewage drains of these spaces are not connected to the wastewater system,
- (3) Tenants who subscribe to energy distribution companies with the permission of the Airport/Terminal Operator.

4. PAYMENT OF THE CHARGES:

- a. The accrual, invoicing and collection of fees specified in this tariff are applied according to the legislations of the airport / terminal operator.
- b. The fees in the tariff are charged in monthly periods.
- c. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- d. Charges in the tariff include VAT.

2026 TARIFF FOR TOOLS, EQUIPMENT, MATERIALS ALLOCATION

1. SCOPE:

This tariff covers the charges to be applied and principles of application regarding the allocation of vehicles, equipment, materials and personnel for ex officio interventions in cases of fire etc. to be deemed necessary by the Airport/Terminal Operators upon the request of the institutions/organizations within or outside the airport/terminal boundaries at the airports/terminals operated by the Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

a) Tools, Equipment Allocation Charges

	Type	İstanbul	Aydın Çıldır, Alanya Gazipaşa, Zonguldak Çaycuma	Zafer Çukurova
		Charge (TL/Hour)		
	A	B	C	D
1	Dye Removing Machine*	657 TL/ m ²	576 TL/m ²	720 TL/ m ²
2	Tire Track Removing Machine	438 TL/ m ²	384 TL/m ²	480 TL/ m ²
3	Runway Marking Machine/Tool	391	343	429

c) Personnel and Service Fees

Service Type	İstanbul	Antalya, Milas-Bodrum, Dalaman, Aydın Çıldır, Alanya Gazipaşa, Zonguldak Çaycuma	Esenboğa, Çukurova, Zafer
	CHARGE (TL)		
Personnel	974 TL/Hour	837 TL/Hour	1.046 TL/Hour
Technical Personnel	1.262 TL/Hour	1.125 TL/Hour	1.406 TL/Hour
Fire Brigade Compliance Report	13.469		
Water Salute	17.007	14.565	18.207

3. PRINCIPLES OF APPLICATION:

- a. The vehicles listed in the schedule are allocated together with sufficient number of operating personnel in-charge. The cost of tools, equipment and materials includes the cost of one user personnel. In the event that more than one personnel is required, personnel fee specified in table 2.c is collected for each additional personnel.
- b. The technical personnel fee specified in table 2.c is charged for the technical personnel to be assigned by the Airport/Terminal Operator for maintenance, repair, transportation and similar cases within the airport. The cost of the required materials are covered by those who requested maintenance, repairment and transfers, etc.
- c. Allocated tools, equipment, materials are used in accordance with the maintenance, repair and operation instructions. It cannot be forced to use it above its capacity and in a way to cause damage. The responsible personnel of the vehicle and the allocated person / organization are responsible for causing damage / malfunction by using it over capacity and / or in violation of the maintenance, repair and operating instructions.
- d. The fee is charged according to the start and end times of the vehicles and equipment, the time spent on the road is not charged.
- e. For allocations, the fees in the Table are charged for the first hour. If the allocation period exceeds one hour, half-hourly fee is applied if it is less than half an hour and full hourly fee is applied if it exceeds half an hour
- f. Vehicles and equipment to be temporarily allocated shall be allocated after maintenance and refueling. The refueling of the allocated vehicles and equipment during the allocation period shall be carried out by the Airport/Terminal Operator. For allocations outside the airport, fuel consumption is calculated and the cost is charged to the person requesting the allocation of vehicles and equipment.
- g. The cost of consumables such as fuel etc. used in fire protection trainings is charged to the person requesting the training.
- h. In case of pollution on the aprons, the personnel, tools, equipment and materials allocated by the Airport/Terminal Operator for cleaning shall be charged to the polluter.
- i. In case Rescue and Fire Fighting Vehicles are assigned outside the airport boundaries except for emergencies, the fees are applied with a 50% increase. In case the vehicles other than Rescue and Fire Fighting Vehicles are assigned outside the airport boundaries, the fees in the tariff are applied as they are.

- j. In case the aprons are polluted by aircraft fuel, the cost of personnel, fire trucks and other vehicles, equipment and materials allocated by the Airport/Terminal Operator for cleaning;
 - (1) From the fuel company in case of pollution caused during refueling,
 - (2) In case of pollution caused by engine test etc., it is taken from the polluting organization.
- k. It is essential that the discharge and transportation of the chemical wastes accumulated in the waste storages as a result of the chemical substances used in the cleaning of aircraft by the ground handling organizations and the operations carried out in the de-icing / anti-icing application areas are carried out by the ground handling organizations. However, in cases of necessity (in cases where ground handling companies cannot send the waste to disposal, the warehouse is full and/or it is determined to cause environmental pollution, etc.), the said process and delivery of the waste to authorized companies shall be carried out by the Airport/Terminal Operator for a fee. Operating expenses at the rate of 25% shall be added to the costs of vehicles, equipment and personnel etc. spent for the unloading and transportation of the said wastes and invoiced to the said companies based on the number of services provided by the ground handling companies (at the rate of usage).
- l. Regulations on Workplace Opening and Operating Licenses for Non-Sanitary Workplaces Located at Airports Open to Civil Aviation (SHY-33A) and Regulation on Workplace Opening and Operating Licenses for Terminals and Sanitary Workplaces Located at Airports Open to Civil Aviation (SHY-33B), the fire department compliance report required for companies to obtain a license must be submitted to the Airport/ Terminal Operator, the Fire Safety Compliance Report fee specified in Table 2.c are charged for workplaces classified as low risk according to the Workplace Risk Classes List in the current Workplace Health and Safety Risk Classes Communiqué published by the Ministry of Labor and Social Security. This fee is applied with a 50% surcharge for workplaces classified as hazardous and a 100% surcharge for workplaces classified as highly hazardous. For premises requiring a Fire Safety Compliance Report, the second inspection conducted after the deadline given to rectify deficiencies following the initial Fire Safety Compliance Report inspection is carried out free of charge. However, if the deficiencies are not remedied during the second inspection and an additional period is granted, a fee equal to twice the Fire Safety Compliance Report fee will be charged for each subsequent inspection conducted until the Fire Safety Compliance Report is issued.
- m. In case a water salute service is requested in the welcome and farewell ceremony for aircraft, the Water Salute fee specified in table 2.c for the service shall be charged. Personnel, vehicles and materials used in the service are charged separately in accordance with the principles in the tariff. ½ of the revenue generated at Istanbul Airport and 1/3 of the revenue generated at Çukurova Airport will be paid to DHMI during the contract period.
- n. Fees for other services which are not mentioned in this tariff but which may be realized are determined by the Airport/Terminal Operator and applied upon approval of DHMI.
- o. In the event that the tools and equipment are transported to another location other than the airport, all expenses such as transportation costs, insurance costs, customs expenses, etc. are borne by the requestor / service recipient.
- p. Even if a part of the aircraft rescue equipment and airbag attachment is used, the full fee in the tariff is charged. During the aircraft rescue operation, the cost of vehicles/equipment/supplies and personnel to be used other than aircraft rescue equipment shall also be borne by the aircraft owner or operator.
- q. At Istanbul Airport, 1/2 of the revenue generated from the Absorbent Dust, Liquid Absorbent Pad and Liquid Absorbent Sausage fee, at Çukurova Airport 1/3 of the revenue generated from the Liquid Absorbent Pad and Liquid Absorbent Sausage are paid to DHMI during the contract period.
- r. Following fuel spills, the collection, transportation, and disposal of waste must be carried out by the companies responsible for the spill. However, in cases of necessity, these operations and the delivery of waste to authorized companies are carried out by Airport/Terminal Operator for a fee. The costs incurred for the collection, transportation, and disposal of the aforementioned waste, including vehicles, equipment, personnel, etc., are issued to the companies concerned with a 25% operating expense added.
- s. **The charges are not applied under the following conditions:**
 - (1) In search and rescue interventions for natural disasters or humanitarian aid,
 - (2) In the event that an ambulance is utilized in the emergency response to aircraft accidents, breakdowns and fires and emergency situations where human life is in danger,
 - (3) In case an ambulance, funeral and escort vehicle is allocated to DHMI personnel or their families,
 - (4) In the services provided in aircraft accidents and fires and other aircraft emergencies,
 - (5) Interventions to all fires within the airport boundaries and interventions to fires that occur outside the airport but threaten flight safety and airport buildings and facilities,

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff.

2026 TARIFF FOR TERMINAL AREA ALLOCATION

1. SCOPE:

This tariff contains the charges and principles of application regarding the allocation of offices, etc. in terminal buildings to airline and ground handling organizations and other institutions/organizations providing services at airports/terminals operated by Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI.

2. PRICING SCHEDULES:

a) Terminal Area Allocation Charges:

1) İstanbul Airport:

3. PRINCIPLES OF APPLICATION:

- a. The rent amount for the places not included in the schedule such as sales area, display showcase, cafeteria, restaurant, buffet, etc. to be allocated to commercial public institutions and other real and legal persons are determined separately by the airport/terminal operator.
- b. Electricity, water, HVAC and general expenses are not included in the rental unit fees. For these;
 - (1) Charges for power, water, sewerage refining, HVAC expenses of the rented volume are determined according to Electric, Water, Sewerage Refining, HVAC Services Tariff.
 - (2) As a participation share to general expenses (GEPS) for operating expenses such as landscaping, infrastructure, general transportation roads facility and rehabilitation maintenance, environmental and road lighting, heating-cooling-ventilation, cleaning, security, general administrative services, etc. of places open to common use;
 - (a) Tenants operating in terminal buildings are charged a GGKP of 20% of the rent amount in addition to the rent amount. However, at Adnan Menderes Airport, Zonguldak Çaycuma Airport, Zafer Airport, 15% GGKP is charged.
 - (b) For touristic, promotional, advertising and promotional purposes, allocations such as desks, stands, panels, etc. (temporary allocations up to three months) are not subject to GEPS.
- c. Authorized organizations wishing to provide Additional Security Services at Terminals are obliged to notify the Terminal/Airport Operator in writing to which airline they will provide this security service and to update the list.
- d. The responsibility for the notifications to be made to the passenger about the Additional Security Service belongs to the company providing the service and the Airline Company.
- e. The company that will provide the additional security service is required to inform the Airport Security Branch Directorate and the Airport/Terminal Operator at the start and end times of the operation.
- f. Additional security-related mobile desk allocation is charged at a single desk rate for flights operated with narrow-body aircraft and at a double desk rate for flights operated with wide-body aircraft. 2(b) Other Allocations are charged according to the Tariff Schedule. In case more than one desk is requested for the same flight, regardless of Air/Land Side; regardless of the number of additional desks, all of them are considered as one desk and the fee in 2(b) Other Allocations Tariff is applied with a 50% discount. (Desk: A service area created to provide additional security services to aircraft, regardless of the number of desks, PCs, etc.). From this revenue item, ½ of the revenues generated at Istanbul, Antalya, Adnan Menderes, Dalaman, Milas Bodrum Airport/Terminals are paid to DHMI.
- g. **This tariff is not applied to the following persons and organisations:**
 - (1) For the area allocations made as necessary during the continuation of the works of the contractors (construction, goods and services) carrying out works on behalf of the Ministry of Transport and Infrastructure or DHMI at the airports,
 - (2) Public institutions/organizations that provide services at airports as part of airport operations and have no commercial nature,
 - (3) Temporary allocations up to 7 days to non-commercial public institutions/organizations.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff. The renting of workplaces where tax-free sales are made and the renting of independent units such as warehouses and warehouses belonging to these workplaces is exempt from VAT in accordance with Article 17.4(o) of VAT Law No. 3065.

2026 TARIFF FOR LAND AND OTHER BUILDING AREA ALLOCATION

1. SCOPE:

This tariff contains the charges and principles of application regarding the allocation of land and other buildings to airline and ground handling organizations and other institutions/organizations providing services at airports operated by Airport Operators within the scope of PPP Projects tendered by DHMI.

2. PRICING SCHEDULES:

a. Land Area Allocation Charges:

AIRPORT	CHARGE (TL/m ²) (Month)
A	B
İstanbul	101,18
Çukurova	111,29
Gazipaşa Alanya	66,86
Zafer	83,66
Aydın Çıldır	65,22
Zonguldak Çaycuma	69,70

b. Charges for Other Buildings:

AIRPORT	ALLOCATION AREA	CHARGE (TL/m ²) (Month)
A	B	C
İstanbul	Shelter, Aerodrome, Storage, Mobo, Worksite Lodge, Container, ULD Racking System and Other Buildings	232,04
Çukurova		255,07
Antalya		204,20
Adnan Menderes		
Dalaman		
Milas Bodrum		
Esenboğa		
Gazipaşa Alanya		196,64
Zonguldak Çaycuma		
Zafer		245,75
Aydın Çıldır		136,20

3. PRINCIPLES OF APPLICATION:

- a. The rental amount for places such as sales areas, display showcases, cafeterias, restaurants, buffets, MRO Aircraft Maintenance Hangars, Private Aircraft Hangars, Warehouses, Free and Temporary warehouses etc. to be allocated to commercial public institutions and other natural and legal persons is determined separately by the airport/terminal operator.
- b. Rent unit charges specified in the tables do not include electric, water, HVAC and general expenses participation share (GEPS). For these;
 - (1) Charges for power, water, HVAC expenses of the rented volume are determined according to Electric, Water, Sewerage Refining, HVAC Services Tariff.
 - (2) As General Expense Participation Shares (GEPS) for the expenses such as landscaping, infrastructure (waste water network, use water, treatment etc.) and general transportation roads facility and improvement, environment and road lighting, public spaces' HVAC, cleaning, security, general administrative services etc.;
- a. 10% surcharge is applied for the lessees located at the airside as well as operating at the airside, although located at the landside,

2026 TARIFF FOR LAND AND OTHER BUILDING AREA ALLOCATION

- b. For the lessees operating at the facilities located at the landside 5% surcharge is applied as general expenses participation share (GEPS) in addition to the lease amount.
 - c. No GEPS is charged for land allocations made in accordance with the 2.a Pricing Schedule.
- c. In addition to the penal sanction in the Ground Service Agreement, a fee of 961,85 TL/m²/Day will be charged for the occupied area in the areas occupied within the airport boundaries without the permission of the Airport Operator. It is applied with a 25% increase at Zafer and Çukurova Airports.
- d. For land allocations with a surface coating other than soil (stone, asphalt, concrete, etc.), the fees specified in the “2.a Land Area Allocation Tariff” table are applied with a 30% increase.
- e. For the buildings constructed by the tenant on the allocated land and to be returned to the Airport Operator at the end of the lease agreement; 50% of the fees in the “2.b Other Buildings Tariff Table” are applied upon the decision of the Airport Operator, provided that the project approvals are available (except for demountable structures such as demountable container, prefabricated structures, etc.).
- f. Tariff fees shown above is applied exactly to the constructions such as Container, Canopy, Shelter, Demountable Container, Mobo etc.
- g. If the allocated buildings belong to the Airport Operator, the fees in “2.b Other Buildings Tariff Table” are applied with a 30% increase.
- h. For hazardous waste spaces to be allocated to companies, the fees specified in 2.b “Other Buildings Tariff Table” are applied with a 100% increase.
- i. Each floor of the buildings constructed by tenants is charged separately according to its m². In order to define a location as a mezzanine; all of the mezzanine or mezzanine floors in a space cannot cover more than 1/3 of the total floor area below. The net height below and above the mezzanine must be min 2.13 m. It should be open to the mezzanine floor and there should be no obstacles. (Except for walls lower than 100 cm)
- j. Airport/Terminal Operator Companies may install electric charging stations within the area allocated to them by their tenants, without seeking any commercial gain and solely for the use of their own vehicles;
 - For electric charging stations covering an area between 0 and 1 m², an additional VAT-exclusive fee of 1.372 TL/unit/month applies.
 - For electric charging stations covering an area of more than 1 m², an additional fee of 2.057 TL/unit/month excluding VAT is charged.
- k. **This tariff is not applied to the following persons and organisations:**
 - 1. For the area allocations made to the contractors (construction, goods and services) carrying out works on behalf of the Ministry of Transport and Infrastructure or DHMI at the airports as necessary during the continuation of their works,
 - 2. Public institutions/organizations that provide services at airports as required by airport management and do not have a commercial nature.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff. The renting of workplaces where tax-free sales are made and the renting of independent units such as warehouses and warehouses belonging to these workplaces is exempt from VAT in accordance with Article 17.4(o) of VAT Law No. 3065.

2026 TARIFF FOR CHECK-IN, TRANSIT COUNTERS, KIOSK AND INFORMATION DESKS

1. SCOPE:

This tariff contains the charges and principles of application to be applied for the allocation of check-in transit counters, check-in kiosks and welcome counters used at airports/terminals operated by Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI General Directorate

2. PRICING SCHEDULES:

a. Check-in, Transit Counter Tariff:

2026 TARIFF FOR CHECK-IN, TRANSIT COUNTERS, KIOSK AND INFORMATION DESKS

e. Local DCS Tariff:

International	
A	B
	Euro
For each passenger	0,25

3. PRINCIPLES OF APPLICATION:

- a. The provisions of the "Check-In Counters Operating Instructions" prepared by the Airport/Terminal Operator are applied for the implementation of this tariff.
- b. If check-in and transit counter temporary allocations exceed the first 2.5 hours, 50% more than the fees in column (A) for International Flights and column (C) for Domestic Flights of the Check-in and Transit Counter Tariff are applied for the exceeding period.
- c. Periods of less than half an hour are completed in half an hour.
- d. For check-in and transit counter temporary allocations, airlines and ground handling service providers must make their requests to the Airport/Terminal Operator officer by signing the relevant form at least one hour prior to the opening of counters. If a system that allows check-in and transit counter temporary allocation requests to be received electronically is active, these requests can be sent electronically.
- e. For the temporary counter allocations, the period;
 - (1) At the terminals with electronic weighscale is available;
 - (a) Commences upon delivery of the electronic weighscale at the check-in counter and ends upon delivery of the weighscale key to the Airport/Terminal Operator's officer.
 - (b) Commences upon the aircraft's using the bridge or parking out, for the transit counters. And ends upon delivery of the transit lounge allocated, to the Airport/Terminal Operator's officer.
 - (2) At the terminals without electronic weighscale, commences upon counter opening and ends upon the staff of the relevant airline or ground handling service provider notifying closure of the counter to the the Airport/Terminal Operator's offer and signing the form.
- f. In the event that a space is allocated to pre-check-in organizations at the check-in counter or ticket sales counter, columns (A) for International Flights and (C) for Domestic Flights of the Check-in, Transit Counter Tariff are applied.
- g. In order to allocate permanent counters, the airline carrier must have obtained a work license to provide passenger services, except for Ground Handling Organizations holding a Passenger Services Operation License. If the number of counters is not sufficient to meet all requests, allocation is made by considering the number of monthly flights.
- h. For permanent counter allocations, if 30 usage per month is exceeded for each counter, the hourly temporary allocation fee in the tariff is applied.
- i. Counters allocated permanently can be used only by the institution allocated. However, when the counters are vacant, temporary allocation to the other companies can be made by the Airport/Terminal Operator for a fee.
- j. Organizations that open temporary check-in counters and/or use baggage/cage measuring devices without permission from the Airport/Terminal Operator shall be charged three times the relevant fees in the tariff.
- k. Electricity used for devices and systems at the counter and kiosk such as electronic scale, computer, monitor etc. is included in the counter allocation fee.
- l. A one-time fee of 6.940 TL is charged for the first installation of the baggage matching system. However, this fee is applied at Esenboğa Domestic/International Terminals and at Zafer and Çukurova Airports with a 25% increase and at Istanbul Airport as 7.895 TL.
- m. At Istanbul, Antalya, Esenboğa, Adnan Menderes, Dalaman, Milas Bodrum Airport/Terminals, where there is no revenue item under the name of Baggage/Cage Measurement Device in the Lease/Application/Concession agreements and annexes concluded between DHMI and Airport/Terminal Operators, ½ of the Baggage/Cage Measurement Device Service Revenues obtained, and at Çukurova Airport, 1/3 of such revenues are paid to DHMI.
- n. The fees listed in Table 2.e are collected from ground service providers for each passenger departing internationally in exchange for the use of the Local Departure Control System (DCS). No fee is applied when air carriers use their own DCS systems. ½ of the Local Departure Control System (DCS) Service Revenue generated at Istanbul, Antalya, Esenboğa, Adnan Menderes, Dalaman, and Milas Bodrum Airports/Terminals are paid to DHMI, while 1/3 of the revenue generated at Çukurova Airport is paid to DHMI.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fees in the tariff.

2026 TARIFF FOR FLIGHT INFORMATION SYSTEM DISPLAY USAGE**1. SCOPE:**

This tariff contains the charges and principles of application about the use of general flight information system monitors at airports/terminals operated by Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI.

2. PRICING SCHEDULES:

AIRPORT	CHARGE FOR FLIGHT INFORMATION SYSTEM DISPLAY USAGE
	CHARGE (Euro / Month)
İstanbul	104,51
Antalya	80,39
Adnan Menderes	
Gazipaşa Alanya	
Zonguldak Çaycuma	
Çukurova	
Esenboğa	100,49
Milas Bodrum	
Muğla Dalaman	
Zafer	

3. PRINCIPLES OF APPLICATION:

- a. Monitor allocation is made if deemed appropriate by the Airport/Terminal Operator.
- b. The monitor rental period is one year and if the monitor subscription is made during the year, the fee until December 31 is charged in advance.
- c. The monitors cannot be relocated or transferred to others without obtaining the Airport/Terminal Operator's permission.
- d. In the event that subscribers cause malfunction/damage to the monitor, they are obliged to compensate for the malfunction/damage.
- e. Organizations renting monitors cannot have their maintenance and repair done by other persons and organizations.
- f. In case of a request to connect monitors to offices that do not have a monitor circuit, a special line is laid if possible. The cost of the materials used and the technical personnel labor fee in the "Tools, Equipment, Material Allocation and Training Tariff" are charged.
- g. **The charges are not applied under the following conditions:**
 - (1) Public institutions/organizations that serve at airports as an obligation to be present due to their duties and do not have a commercial nature,
 - (2) During check-in on the monitor for flight information (airline company, aircraft call name, etc.) located on the check-in counter and integrated with the counters.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. The first installation, transfer and breakdown and control fees are collected in advance.
- c. Cost of the parts that are required to be replaced during the monitor maintenance process are paid by the organization, to which the monitor is assigned, to the Airport/Terminal Operator within seven days from the date of application of the charge.
- d. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- e. VAT is not included in the fees in the tariff.

g. Alanya Gazipaşa and Zonguldak Çaycuma Airports Car Park Tariff:

3. PRINCIPLES OF APPLICATION:

2026 CAR PARK TARIFF

- a. In parking lots with automatic entry and exit vehicle recognition systems, parking fees are charged according to the entry and exit times in the system. In parking lots without an automatic entry and exit system, vehicles that enter and exit on the same day by not presenting the parking card / receipt at the exit are charged a 12-24 hour parking fee regardless of the parking time.
- b. The monthly subscription period covers a period of 30 days from the first entry and without any exit. In case of multiple entries and exits in the Monthly Subscription application, the fee in the table is applied with an increase of 25% (except for personnel vehicles on duty at the airport). All subscriptions must be made within the first 3 hours from the parking lot entrance time.
- c. The fee to be calculated according to the duration of stay in the parking lot is charged with a 100% increase from those who do things such as washing vehicles in parking lots and disposing of waste from vehicles.
- d. In the event of not leaving the car park within 20 minutes following the payment, the period exceeding 20 minutes is charged as per the tariff.
- e. Provided that DHMI is informed, car park operators may apply free of charge or discount on the tariff.
- f. For parking exceeding 24 hours without a subscription, for the full days full day charge (12-24-hour charge) specified in the tables must be paid and for the remaining hours, hourly charge found by dividing the full day charge to 24 and multiplying the value found with the exceeding hours must be paid.
- g. The first 15 minutes are free of charge at airports where the terminal can be accessed by mandatory entry from the parking lot and at terminal/airport parking lots where stopping/stopping on the roads in front of the terminal is prohibited by the Security Commission.
- h. A part of the parking lot (provided that 10% of the parking lot capacity is not exceeded) may be rented to third parties for special purpose services.
- i. **The charges are not applied under the following conditions:**
 - (1) Vehicles listed in Act No. 5018 in the general budget listed in the State Organization Central Registration System DETSİS, (Including rented vehicles purchased through service procurement) other than public administrations, special budget agencies, regulatory and supervisory agencies, social security institutions, local administrations (for a maximum of 2 hour)
 - (2) Vehicles with Corps diplomatique plate numbers (upto an hour)
 - (3) Vehicles used/occupied by disabled persons, veterans and duty invalids, provided that they present their documents (up to a maximum of 15 days each time), (For uses exceeding 24 hours, if the disabled person presents the passenger boarding pass or ticket for their travel),
 - (4) Private vehicles of the 1st degree relatives of the families of the martyrs (up to maximum 15 days each time)
 - (5) Private vehicles driven by DHMI staff (including DHMI retired staff),
 - (6) Private vehicles of the General Directorate of Civil Aviation staff using parking lots operated/operated by DHMI.

4. PAYMENT OF THE CHARGES:

- a. The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b. Parking fees are collected in advance at the exit of the parking lot. Monthly subscription fees are collected in advance at the beginning of the subscription.
- c. Charges in the tariff include VAT. If there is a change in the VAT rate, action is taken accordingly.

2026 TARIFF FOR VIDEO AND PHOTOGRAPH SHOOTING

1. SCOPE:

This tariff contains the charges and principles of application about the photography and filming to be carried out on the land/air side at the airports/terminals operated by the Airport/Terminal Operators within the scope of PPP Projects tendered by DHMI General Directorate.

2. PRICING SCHEDULES:

AIRPORT	FILM SHOOTING PERIOD		PHOTOGRAPH SHOOTING	
	0 – 6 Hours	Over 6 Hours Per Hour	0 – 6 Hours	Over 6 Hours Per Hour
	CHARGE (Euro)			
İstanbul	5.670	1.134	1.050	210
Antalya				
Dalaman				
Çukurova				
Milas Bodrum	5.400	1.080	1.000	210
Adnan Menderes				
Esenboğa				
Zafer	3.250	650	600	120
Gazipaşa Alanya				
Zonguldak Çaycuma				
Aydın Çıldır				

3. PRINCIPLES OF APPLICATION:

- a. Individuals or legal entities wishing to take photographs or film at airports must submit a written application for filming permission to the Airport and Civil Administration Authority at least fifteen days prior to the filming date. The filming application letter must specify the "start and end times of filming" and the "total number of people" who will be coming to the airport for filming.
- b. For the shootings at the airports jointly used by Military/ the Airport/Terminal Operator /DHMI, written permission must be obtained from the civil administration office and military authority as well.
- c. If the shooting time is less than six hours, the full six-hour fee is charged. For each hour exceeding six hours, the hourly shooting fee listed in the table is charged in addition to the first six-hour fee.
- d. A fee of 10% of the shooting fee is also added for electricity, water, etc. utilized during the shooting. Service fees for parking lots, vehicles, equipment, personnel and the like are collected separately from the natural or legal person shooting.
- e. Parking, vehicle, equipment, airport entry card for personnel, apron vehicle special license plate, etc. related service fees are additionally collected from the individual or legal entity making the payment.
- f. Any damages and losses caused at the Airport/Terminal during filming due to fire, damage etc. will be determined by the the Airport/Terminal Operator and paid by the natural or legal person making the shooting.
- g. The duration of photography and filming begins upon entry into the filming area and ends when all equipment, gear, and personnel have exited the filming area.
- h. If the photography and film crew and support staff exceed 10 people, the shooting fees in the rate table will be increased by 50%, and if they exceed 20 people, they will be increased by 100%.
- i. **The charges are not applied under the following conditions:**
 - (1) For filming done by the public companies/organizations or private companies on behalf of the public companies/organizations, (Except for state and foundation universities' aircrafts)
 - (2) For filming done by or on behalf of DHMI,
 - (3) For the news shooting.

4. PAYMENT OF THE CHARGES:

- a. Charges specified in the tariff are collected in advance prior to filming from the real or legal persons intending to make photograph or film shooting.
- b. For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c. VAT is not included in the fee in the tariff.

2026 TARIFF FOR GENERAL AVIATION TERMINAL

1. SCOPE:

This tariff contains the charges and principles of application about CIP/General Aviation Terminal services provided at the airports/terminals operated by the Terminal Operators within the scope of PPP projects tendered by DHMI.

2. PRICING SCHEDULES:

a) General Aviation Terminal Service Charges:

AIRPORT	INTERNATIONAL FLIGHT		DOMESTIC FLIGHT		TRANSIT FLIGHT (INTERNATIONAL/ INTERNATIONAL)	
	General Aviation	Passenger Security	General Aviation	Passenger Security	General Aviation	Passenger Security
	CHARGE (Euro/Passenger)					
İstanbul	201,00	11,00	67,50	4,00	101,00	7,50
Çukurova	154,50	11,00	52,00	4,00	77,50	7,50
Antalya						
Adnan Menderes						
Esenboğa						
Milas Bodrum						
Muğla Dalaman						

3. PRINCIPLES OF APPLICATION:

a) For each arriving and departing passenger, International - Domestic General Aviation Fee is charged according to the direction of arrival/departure. Flights with no passengers subject to a fee are not charged.

As an exception to this situation; in flights where there are no fare-paying passengers in both arrival and departure directions, if the flight crew enters and exits from the General Aviation Terminal:

- 1) Number of Flight Crew 0-3 one General Aviation fee.
- 2) Number of Flight Crew 4-6 two General Aviation fee.
- 3) Number of Flight Crew 7-9 three General Aviation fee.
- 4) Number of Flight Crew 10 and more, four General Aviation fee is charged.

b) The fees specified in this tariff shall be accrued and collected according to the provisions of the contract concluded between the Airport/Terminal Operator and the company providing service.

c) "General Aviation Terminal Usage Form" for the aircraft that will use the General Aviation Terminal shall be filled in correctly and completely by the representative of the relevant ground handling company or the company that will operate the flight and submitted to the Airport/Terminal Operator. The Airport/Terminal Operator checks the accuracy of this declaration and charges are made according to this declaration.

d) "Passenger Service" fee and "Transit/Transfer Passenger Service" fee are collected according to the "Passenger Service Tariff" for each outgoing passenger, and Passenger Security Fee is collected separately for each outgoing passenger, depending on the direction of departure.

e) A fee of 30% of the passenger service fee is charged for each departing PetC (pet carried in the cabin) and 50% of the passenger service fee for Avih (pet carried in the under-flight baggage). 1/3 of the revenue generated from the service at Çukurova Airport and ½ at other airports is paid to DHMI.

f) At Antalya, Milas Bodrum, Adnan Menderes and Esenboğa Airports, ½ of the revenue to be obtained from Domestic and International Transit/Transfer Passenger Fees included in the Passenger Service Tariff and to be collected from airline organizations/representatives by Airport/Terminal operators are paid to DHMI.

g) At Muğla Dalaman Airport; ½ of the domestic line transit/transfer and international line transit passenger fee (**excluding "International Line Transfer Passenger Service Fee" charged to the passenger arriving from international line and continuing to international line**) included in the Passenger Service Tariff is paid to DHMI.

h) At Istanbul Airport; 1/2 of the Domestic Transit/Transfer Passenger Fee in the Passenger Service Tariff is paid to DHMI by the Incumbent Company.

2026 TARIFF FOR GENERAL AVIATION TERMINAL

- i) At Istanbul, Antalya, Adnan Menderes, Milas Bodrum, Muğla Dalaman, Airports, ½ of the revenues obtained from Passenger Security Fees specified in General Aviation Terminal Service Fee Tariff and the revenue obtained from Transit Flight Passenger Security Fees at Esenboğa Airport are paid to DHMI.
- j) At Çukurova Airport, 1/3 of the revenues obtained from the Domestic Passenger Security Fee specified in the General Aviation Terminal Service Fee Tariff are paid to DHMI.
- k) Flights made by foreign registered aircraft within the country are considered as international flights and fees are charged accordingly.
- l) Greeters and farewell passengers using the General Aviation Terminal are charged ½ of the Domestic General Aviation Fare in the Tariff Table if they use the terminal.
- m) In case the General Aviation Terminal is used for ambulance flights, the General Aviation fee in the Tariff Table is not charged from the sick passenger. Passengers accompanying the sick passenger, such as companions, etc. are charged full fare. In ambulance flights, passenger service and passenger security fees are charged separately for all passengers including the sick passenger.
- n) Domestic/international scheduled/non-scheduled passengers using the General Aviation Terminal are charged the Passenger Security Fee specified in the General Aviation Terminal Tariff.

4. PAYMENT OF THE CHARGES:

- a) The charges specified here are accrued, invoiced and collected according to the principles of the legislation of the airport / terminal operator.
- b) For the payments made through bank, all expenses resulting from the payment / money transfer such as bank commission and remittance fee are paid by those who make the payment.
- c) The amounts less than 100.-TL excluding VAT will be invoiced with VAT in accordance with the article 13 of VAT Law No. 3065 although the amount of 100.-TL and above is free of VAT according to the same article. In case of change in the exempted amount, procedure is conducted accordingly.
